TZ-17 Thermolizer

Description

Belshaw's TZ-17 Thermolizer is part of the Thermoglaze system for frozen donut processing. The TZ-17 is designed for thawing and maintaining moisture in frozen donuts over a period of up to five hours. In this way, frozen donuts can be reheated in less than 5 minutes.

The TZ-17 has adjustable heat and humidity controls and with a blower system for evenly circulating warm air.

The TZ-17 does not plug into the Thermoglaze and is operated independently

Standard features

- Accepts 17"x25" screens (also accepts up to 23"x23" screens)
- 17 shelves with 3" shelf spacing when all 17 are used
- Capacity 68 dozen donuts/hour at proofing time 30 minutes (using 17" x 25" screens holding 24 donuts each)
- Six plexiglass doors (enables the operator to put in or take out one or two screens as they are ready, without opening a full height door)
- Thermostat-controlled adjustable dry heat
- Thermostat-controlled adjustable humidity (water reservoir with element)
- Blower system for evenly circulating warm humid air
- 4 heavy duty casters (2 lockable)
- Fully self-contained electical compartment that can be removed like a drawer
- Removable shelves
- Stainless steel construction
- No plumbing, hard wiring or special installation
- 208 or 240V operation
- ETL certified to UL-197, CSA C22.2. NSF certified

Options

- Auto-water connection
- Worldwide voltages (see model selection)

Belshaw TZ-17 Thermolizer

Dimensions

▪ Overall height: 75" (190cm)
▪ Overall width: 28" (71cm)
▪ Overall depth: 32" (81cm)

## Shipping data

Data is approximate for North America shipments

▪ Carton size: 80" x 37" x 31"
▪ Carton weight: 300 lbs (137 kg)

Certifications

▪ Certified by ETL to UL-197, NSF Std 4, and CSA C22.2
▪ Certified by NSF Std 4
▪ CE approval on selected models (see table below)
