DETAIL "Y"

WEIGHT OF INDIVIDUAL CLEANER		
CONE MATERIAL		LBS (Kg)
CERAMIC	EMPTY	22 (10)
CERAMIC	FULL	43 (19.5)

NOTES:

1) REFER TO INSTRUCTION MANUAL FOR INSTRUCTIONS ON INSTALLING, OPERATING, AND MAINTAINING CLEANER SYSTEM.

2) SULZER PAPERTEC ASSUMES NO RESPONSIBILITY FOR THE DESIGN OF SUPPORTS, FOUNDATION, STRUCTURAL AND CONCRETE WORK, OR ANY OTHER EQUIPMENT NOT SUPPLIED BY IT.

3) CLEANERS TO BE INSTALLED AFTER UNIT HAS BEEN GROUTED IN PLACE.

4) ANCHOR BOLTS, NUTS, AND WASHERS ARE TO BE SUPPLIED BY CUSTOMER.

5) FOUNDATION DESIGN TO INCLUDE 25% DYNAMIC LOAD ABOVE OPERATING WEIGHT.

6) FEED, ACCEPT, AND REJECT PRESSURE GAUGES AND TRANSMITTERS SHOULD BE LOCATED AT THE SAME ELEVATION AS THE RESPECTIVE HEADERS ON THE CLEANER BANK. THIS PREVENTS MEASUREMENT INACCURACIES DUE TO ELEVATION DIFFERENCES. THE PRESSURE GAUGE/TRANSMITTER SHOULD BE WITHIN APPROXIMATELY 8 INCHES OF THE CLEANER BANK, AS FAR FROM DISCONTINUITIES AS POSSIBLE, AND ON THE SIDES OF HORIZONTAL PIPE RUNS WHERE POSSIBLE.

7) MAXIMUM OPERATING PRESSURE - 60 P.S.I. (4.1 BAR)
MILL MUST PROVIDE SOME TYPE OF PRESSURE RELIEF SYSTEM TO PREVENT UNIT FROM BEING OVER PRESSURIZED.

8) REFER TO INSTRUCTION MANUAL BEFORE LIFTING.

9) WARNING
NEVER TIGHTEN FOUNDATION NUTS IN SUCH A WAY AS TO CAUSE STRESSES ON THE HEADER ASSEMBLY WHICH WILL CAUSE MIS-ALIGNMENT OF THE CLEANERS.

10) ALL FLANGE CONNECTIONS ARE 150# ANSI 16.5 DRILLED VAN STONE TYPE.

11) MAXIMUM ELUTRIATION PRESSURE = 60 PSI
MINIMUM ELUTRIATION PRESSURE = 20 PSI GREATER THAN ACCEPT PRESSURE.
MAXIMUM ELUTRIATION TEMPERATURE = 130°F
