

IT'S ALL ABOUT LINES...

SELF-PROPELLED | WALK-BEHIND | TRUCK KITS | LINE REMOVAL

SELF-PROPELLED LINE STRIPERS

SELF PROPELLED line strippers are **NOT** about relaxing and laying back while striping. **VEZOS SP** strippers ensure steady pace and accurate line marking even when striping lines without a ride along seat or even uphill fully loaded.

Yes of course you can ride instead of walk with a line stripper seat attachment, but lets analyze the actual difference in use when working with a self-propelled line stripper;

Line strippers are not light weighted, on the contrast they need their weight to ensure stability, but what happens when you need the steady pace but your job site isn't ideal for a seat, pushing a heavy unit is not easy and definitely will not be productive all day...

PROSTRIPER SP line strippers have the self-propelled system located on the line stripper and not on the ride along seat, for exactly this reason; allowing contractors to drive the stripper instead of pushing it, no matter the weight load, road gradient or narrowness of the job site.

A clever motion control is located on the bar handle making it easy to accelerate or even reverse the stripper, a little like driving a motorcycle.

PROSTRIPE 400SP

intersection & city road line striping

PS 400 FEATURES:

2.5 gpm | 9.5 lpm

single or double color

linematic | pressurized

self-propelled striper with
SP system located on unit

PS 400 INSIGHTS

self-propelled selective steering hydraulic line striper

PROSTRIPE 400 line striper is a fully automatic, self-propelled line striper with an innovative selective steering drive method.

The steering mode converts the striper from a free front caster wheel to a precisely controlled line striper ideal for intersections, roundabout striping etc. when precision is a MUST!

Its self-propelled system is located on the striper allowing contractors to stripe with ease and steady pace with or without the ride along seat.

A steering turning selection indicator with lock in radius points will assist users while striping curved roadways and roundabout intersections, no tools needed to adjust the setting.

The entire operation of the PS400 is made from the console, including a skip line controller, gallon totalizer & counter, engine & system on/off, kill switch, engine throttle, hand brake, gun activation & even a cup holder...

Adapt VEZOS double ride method FLIPDRIVE seat and enjoy a panoramic view of the entire job site.

*multiple execution available

PROSTRIPE 400SP

PROSTRIPE 400 SELF-PROPELLED | SELECTIVE STEERING INSIGHTS

SELF-PROPELLED LINE STRIPER

- ✓ SP system located directly on the striper
- ✓ 3-way drive / ride system
- ✓ Motorcycle type motion control drive
- ✓ Operation speed 16 km/h

SELECTIVE FRONT WHEEL STEERING (SWS)

✓ Position A:

Precise steering from handle bar with automotive type steel bar

✓ Position B:

Free front caster wheel for increased maneuverability

- ✓ Center lock-in front wheel in both positions
- ✓ 6 ply durable tire
- ✓ Operation speed 16 km/h

WIDE VIEW DESIGN

- ✓ Low profile design for panoramic view of job site
- ✓ Road view ahead even in sitting position
- ✓ Extreme visibility even with glass bead tank in place
- ✓ No head or body tilting to stripe | Safety first

FLIPDRIVE LINE STRIPE SEAT

- ✓ Double ascent ride | sit – stand ride along
- ✓ Tow behind attachment
- ✓ Rear extra space for cones or gas tank
- ✓ Hidden tool compartment with anti-slip surface
- ✓ Hydraulic oil reservoir with two divided sections & oil level indicator
- ✓ Anti-vibrations control

HYDREX PISTON PUMP

- ✓ Hydraulic piston pump HYDREX 70
- ✓ 1 color set up
- ✓ Slow stroke 9.5 l/m (2.5 gal/min) delivery
- ✓ Built in filter

PAINT HOPPER 115 lit | 30 gal

- ✓ Low profile paint tank for increased visibility
- ✓ Inclined slope bottom
- ✓ Single color with pump inlet
- 1 color 115 lit | 30 gal capacity

- ✓ Lift brackets & security hitches

GLASS BEAD TANK 50 lit | 13 gal

- ✓ Pressurized bead system
- ✓ Steel tank with pop up valve for increased safety
- ✓ Removable loading funnel (no tools required)

AUTOMATIC GUN OPERATION

- ✓ 1-2 automatic paint & glass gun set-up
- ✓ Adjustable gun height
- ✓ On board stencil kit with manual airless spray gun & hose
- ✓ Two piston high volume air compressor to support multiple bead guns with 3.6 lit air accumulator

OPERATION CONSOLE PS400

- ✓ Turning radius indicator with lock-in system
- ✓ Skip line controller for multiple gun operation
- ✓ Gallon totalizers & counters
- ✓ Kill switch | Engine throttle
- ✓ Engine & system ON/OFF
- ✓ Gun actuator (trigger)
- ✓ Hand brake & cup holder

self-propelled hydraulic line striper

PROSTRIPE 300SP hydraulic line strippers are the ideal units for medium to large line marking contractors that are looking to get the most out of their equipment. This self-propelled range can be operated with or without a ride along seat depending on the striping needs. When attaching the FLIPDRIVE seat choose between a sitting or standing position.

Easy no pedal drive mode with VEZOS motorcycle type motion control placed on the steering bar, twist the grip towards you (so that your wrist moves down) to drive forwards and to reverse twist the grip in the opposite direction.

Front or rear gun mount system - no tools needed. The airless paint gun(s) can easily be removed from the holder and used for stenciling marking.

Available in several executions such as 1 & 2 color with VEZOS slow stroke HYDREX piston pumps, manual or automatic, gravity or pressurized glass bead system...

PROSTRIPE 300 line strippers have a foldable chassis ideal for easy transportation even in a city van.

LINE STRIPERS

WALK-BEHIND

Lines are all around us; they serve as a safety guide while parking, driving and even crossing the road. Line striping parking lots, school playgrounds, sport fields, city roads are a few applications that can be performed with a walk-behind line striper.

Easy to operate and with a low maintenance cost, PROSTRIPE WB series offer high production and precise stripes for a wide series of marking applications such as parking lots, city roads, ports, intersections, cross-ways, athletic fields etc.

VEZOS walk behind line striper have a foldable chassis for easy transportation in any city van.

The airless spray gun can be removed from the gun holder, in order to perform stenciling for signalization of disable spots, parking slot numbering, warning and more.

The walk-behind series is available in several executions such as standard, automatic, pressurized bead system, double color...

PS 300 WB INSIGHTS

walk behind hydraulic line striper

PROSTRIPE 300WB hydraulic line striper are equipped with a slow stroke paint pump, offering accurate material pumping and line precision for striping application such as parking lots, intersections, athletic fields, road maintenance and local city marking jobs.

VEZOS T.C.S. technology ensures correct cooling through out the entire hydraulic & paint system, no matter the environment temperature. Compatible with all common road paint, heavy VOC paint, waterborne, rubberized marking paint, 1 & 2 component.

PS300WB series is available in several executions such as manual & automatic, gravity or pressurized beads, 1 or 2 color pump set up, single or double paint hoppers, with line controller...

With a low profile design even when including the bead system and paint hopper, the PS 300WB ensures stability and long distance visibility at all times.

For re-striping applications a pointer can be adapted left or right of the striper, rear gun mount for long line striping & removable gun for stenciling are standard features.

walk behind hydraulic line striper

PROSTRIPE 200WB hydraulic line striper offer accurate material delivery and line precision for striping application such as parking lots, cross-ways, ports, athletic fields, city road maintenance and local striping jobs.

The PS walk-behind line strippers have a foldable chassis for easy transportation and storage, even in a small city van.

Unlike other line strippers on the market, VEZOS PROSTRIPE 200 has been engineered with precision and stability in mind. Thanks to its perfectly balanced design and powerful HYDREX piston paint pumps, this game-changing line striper makes it easy to achieve sharp, clean lines that stand out in any space.

With a retractable storage compartment under the steering bar, for easy and convenient storage of your essentials, making your workday more efficient and hassle-free.

Ideal for medium size jobs, with a removable gun for stenciling or other touch up jobs.

hidden storage compartment,
simply lift the side lever

Available LED light kits connect with

HD Power Generator Pack

HD POWER GENERATOR PACK

Adapt VEZOS "POWER PACK" to any
PRODRIVE HD ride along seat and light up the
job site with a 180watt - 12volt power source.
(available for electric & pull start engines)

PRODRIVE HD

SELF-PROPELLED / DRIVE ALONG SEAT / 2024

parking lots & local road line striping

CLOSED & COMPACT

FULLY OPEN

PRODRIVE HD SP seat has a large retractable storage platform at the rear end, this way users can carry along cones, gas tank or even give a friend a ride :) A hidden storage space can be found by tilting the engine cover.

Powered by a reliable HONDA GX engine and offered as a manual pull or electric start unit. Its self-propelled system ensures a 16 km/h drive speed and accurate brake system activated with a foot pedal located at the front of the unit.

PRODRIVE HD ride along seat can connect to all PROSTRIPE line strippers with its heavy duty hitch kit. Of course VEZOS design team did not leave it at that, due to its **adjustable concept** the PRODRIVE HD can connect to any branded striper.

**COMPATIBLE
WITH ALL
BRANDS
& LINE
STRIPERS**

LINE STRIPERS TRUCK MOUNT

Truck mounted line striping kits are adapted directly on the trucks bed with 4 bolts. The entire system can be lifted from several angles via a fork lift and installed within a couple of hours by your in house engineer.

Depending on your average line striping jobs, desired vehicle size and investment capital VEZOS has a wide average of ready to stripe kits that can cover your road marking needs.

The RM striping kits are hydraulically operated and equipped with HYDREX slow stroke piston pump ensuring correct material flow and precise line marking every time.

These modules are categorized depending on the offered material flow therefore if you are new to the road striping industry VEZOS offers an entry level kit,

for you to start your marking business gradually and get familiar with the procedure. Nothing stops here though, for more advanced contractors and larger job you will find striping kits that can offer up to 38 lpm with 1 or 2 pumps, simultaneous left-right striping, pressurized steel glass bead tank and the list goes on.

RM STRIPING KITS

RM 10.0 KIT

highway road & line striping kit

RM 10.0 FEATURES:

10.0 gpm | 38.0 lpm

HYDREX 230 pump (1-2qty)

double arm bracket (opt)

KOHLER engine
26.5 hp

RM 10.0 INSIGHTS

truck mounted set up, adapt to any vehicle

RM 10.0 line striping kit can be adapted to any truck and offers maximum power & production rate, equipped with a 26.5 hp KOHLER engine and double HYDREX HD pumps, this option is a serious solution for the most demanding contractors. Take advantage of VEZOS double sided arm bracket for simultaneous line striping and increased profit. Operate the entire system from the trucks cabin or deck with a pre installed skip controller, HD monitor & camera kit.

UNIQUE FEATURES

Loading steps for easy access to the glass bead system, double bracket and double HD camera kit, triple oil divided section reservoir, HD air compressor and a fully retractable chassis are just a few of the RM 10.0's special features that will allow contractors to get the job done fast and precise.

The truck mounted system is fully retractable and fits entirely on the trucks bed without any loose parts, ensuring the equipment's safe keeping and transportation from site to site.

RM 10.0 KIT

RM 10.0 HD TRUCK MOUNTED STRIPING KIT INSIGHTS

HYDREX PISTON PUMP

- ✓ Hydraulic piston pump HYDREX 230
- ✓ 1 or 2 color set up
- ✓ Slow stroke 38.0 l/m (10.0 gal/min) delivery
- ✓ Built in filter with gauge

GLASS BEAD TANK 600 kg | 1300 lb

- ✓ Pressurized bead system
- ✓ Loading steps for easy refill
- ✓ Steel tank with pop up valve for increased safety
- ✓ Removable loading funnel (no tools required)

AUTOMATIC GUN OPERATION

- ✓ 2-4 automatic paint & glass gun set-up
- ✓ Adjustable gun height
- ✓ On board stencil kit with manual airless spray gun & hose
- ✓ Two piston high volume air compressor to support multiple bead guns with 3.6 lit air accumulator

ARM BRACKET(S)

- ✓ Single or double arm bracket
- ✓ Simultaneous left & right line striping
- ✓ Complete with electro-pneumatic set-up

OPERATION CONTROL

- ✓ Skip line controller 4 channel
- ✓ HD monitor & camera kit
- ✓ Manual trigger

FULLY RETRACTABLE - ALL IN ONE

- ✓ Arm bracket(s)
- ✓ Chassis
- ✓ Slide beam
- ✓ Entire system fits in truck | pick up

PALLETIZED DESIGN

- ✓ Palletized box type
- ✓ Fork lift pick up
- ✓ Easy installation

EXTRA FEATURES

- ✓ GX HONDA engine 22 HP
- ✓ Front mounted removable re-striping pointer
- ✓ Central hook lifting point
- ✓ Hydraulic pressure accumulator
- ✓ Full flow hydraulic cooler
- ✓ Divided section oil reservoir
- ✓ 2K material pre-installed set up for future installation

RM 5.0 KIT

level up road & line striping kit

RM 5.0 FEATURES:

5.0 gpm | 19.0 lpm

HYDREX 230 pump (1-2qty)

Bead tank 600lbs | 280kg

in-cabin operation
fully automatic

RM 5.0 INSIGHTS

single or double color, fully retractable

RM 5.0 is equipped with a single or double high performance HYDREX slow stroke hydraulic piston pump providing correct paint delivery through-out the entire striping procedure, ideal for double color line striping.

A full flow large hydraulic cooler is installed on the RM 5.0 ensuring correct flow & temperature of the entire system. Unlike other designs in the market, VEZOS entire flow of hydraulic oil goes through the large HD hydraulic cooler with VEZOS TCS technology, making it possible for RM users to work under any severe usage.

TCS Tunnel Cooling System technology

All hydraulic elements (hydraulic oil pump, oil cooler, both sections of the hydraulic tank) but also the linear motor of the HYDREX (1 or 2 pumps) are within the air cooling stream, making VEZOS innovative design the most advanced hydraulic setup available in the market

The entire system works with a unique design of separate sections of hydraulic oil tanks - reservoir, that ensure the best feeding of the hydraulic pump. This design also maximizes the cooling effect of the entire hydraulic operation.

EASY INSTALLATION SECURE WITH 4 BOLTS

VEZOS RM truck mounted line stripe kits, can easily be adapted to any van or truck bed. The entire system is retractable and fold-able, including the chassis, rear beam and arm bracket. Each kit can be lifted with a fork lift via several angles, due to the kits palletized design.

The RM kit installation can be performed at your premises, by any in-house engineer within a few hours. All components, screws, cables etc. are included. If your kit includes a HD monitor, camera and skip controller set, then a in-cabin stand will be offered by VEZOS, free of charge.

controller

RM 2.5 INSIGHTS

entry level truck mounted striping kit

RM 2.5 has a fully retractable chassis. Everything folds up, everything fits in your vehicle. No loose pieces, no tools, no effort. One operator, one unit!

Select line patterns, monitor your material consumption and life long job data. Combine the line controller with VEZOS HD camera & monitor kit. Make road striping a one man job!

The set up includes a pressurized glass bead system 100kg capacity, with a wide loading inlet 82mm / 3.2" & with popup valve.

Equipped with a single or double HYDREX paint pump, ideal for double color striping. Easy guidance with a front mounted pointer, located on the truck, for precise re striping applications.

VEZOS trusts HONDA engines when it comes down to powering its road marking equipment. HONDA GX engines are covered by a worldwide warranty program.

FITS ON A PICK-UP & SMALL TRUCK IDEAL FOR CITY STRIPING

VEZOS RM 2.5 entry level line striping has a fully retractable chassis. Everything folds up, everything fits in your vehicle. No loose pieces, no tools, no effort.
One operator, one unit!

VEZOS has aimed to design a road striping unit that is the real deal.

RM 2.5 truck mount system can fit and fold on a pickup truck, a van or box type truck and can also be adapted to a trailer. Its heavy duty steel frame will last a life time and a custom made spring system located on the arm bracket will ensure shock absorbance, line stability and a perfect result every time.

POWERMAX Pumps

platform based
TCT technology

ROADMASTER TRUCK INSIGHTS

long line road marking trucks

Line striper trucks are designed for long line striping and highway marking. ROADMASTER trucks are equipped with two autonomous hydraulic circuit systems; ensuring safety & usage economy, single or double heavy duty HYDREX PowerMax piston pumps with an outstanding material delivery up to 30 gpm@2150 psi and TCS technology throughout the entire hydraulic system. Choose between our standard setup or custom build your truck depending on your needs!

While setting up your truck we offer your several operation station options that normally depend on the truck size, for example the entire system can be operated directly from the cabin by one person, or by a user located in a custom built station (cabin or canopy). VEZOS ensures the latest guidance & monitoring technology with HD cameras, skip controllers will be installed on the truck, enabling correct striping and communication while on the job.

The ROADMASTER set up is either built directly on your truck or the entire system is built on a platform base, ready to be placed directly on your trucks bed.

SCARIFIERS

LINE REMOVAL

PROGRIND scarifiers cover a large series of surface preparation applications, designed only for professional use due to their heavy-duty structure and high speed cutting technology.

Safety must always come first, think of unlevelled industrial flooring, multiple old line striping on a road or intersection and so many other case scenarios that can cause an accident.

Surface preparation is crucial for our everyday safety, VEZOS offers specially designed machinery to achieve the best possible result without damaging the surface. Line striping removal scarifiers allow contractors to remove old markings before re-striping new lines, making sure that drivers stay focused on the road while driving.

The PROGRIND range offers several cutting drum options depending on the untreated surface. Road kits, vacuum connections, drive along attachments and many more accessories can build up the scarifier in order to tackle the most demanding surface treatment applications.

VEZOS designs and manufactures, a full range of hydraulic operated line striping machinery equipped with innovative technology and cost efficient solutions. Among the range, contractors can find walk-behind and self-propelled line strippers ideal for parking lots, intersections and local marking applications; Truck mounted road marking modules that

can be adapted to any van or truck, a full custom built series of road striping trucks for long line road striping and a wide series of scarifying equipment for line removals. Among VEZOS product range, painting contractors in the commercial & residential industry can find solutions for airless paint spraying units, drywall sanders and

Each product that is designed MUST offer a difference to its user, it MUST be innovative and cost effective to the industry. VEZOS design team has an aim, an aim to differ from the competition with cutting edge solutions that define the brands unique character.

piston pumps for all types of coating applications. With over 150 products, VEZOS has the right solution for all contractors. The company was founded in 1970, designing and manufacturing pneumatic pumps for the marine and industrial market. Over the years and under second generation management, VEZOS group expanded its manufacturing line offering innovative products to the contracting and road marking industries.

Today, VEZOS GROUP has a well-organized distribution network around the globe, offering solutions & cost effective products to contractor in all three industries.

With offices in the UK, USA and Europe, VEZOS offers a wide series of innovative and heavy duty spraying and surface preparation equipment to private contractors, municipalities, governmental organizations and construction firms.
