DIAMOND BILT PM400 & PM800 EMULSION SPRAYERS

The Diamond Bilt Pave-Mates 400 & 800 are designed for a contractor who needs more capacity for their tack pot. With a 400 or 800 gallon capacity, you'll need fewer trips to refill. The GVWRs of 6,000 and 9,999 lb respectively mean no special driver's license is required to tow these trailers. These units come standard with an electric start engine, electric brakes, automatic ignition burners, 25' spray wand hose, and a Diamond Bilt lightweight spray wand featuring a stay cool handle and no drip tip. Both sizes are available as a skid or trailer unit and are a perfect fit for a spray bar.

Options and customization available to make sure your unit fits all of your needs.

CALL TODAY! 530-674-8577

Diamond Steel Co, Inc. is a family owned and operated company that strives to provide well-engineered, high-quality construction equipment.

Standard PM800T

PM400TD with Platform and Spray Bar

PM800TD with Platform and Spray Bar

FEATURES

- Available as a Skid or Trailer Unit
- 400 or 800 Gallon Tank
- Round tank for easy drainage and prevention of emulsion build-up
- Electric Start Engine
- Push Button Ignition LPG Burner with regulator and gauge
- Flush/Recovery Tank for quick clean up of the pump, plumbing, hoses, and Spray Wand
- Plumbing and Spray Wand recirculation keeps tack evenly heated and prevents emulsion from solidifying in the plumbing hose or Spray Wand
- 5' light weight Diamond Bilt Spray Wand featuring stay cool handle and no drip tip
- D-Wraps for Easy Hose Storage
- 25-foot Spray Wand hose
- Standard Color: Black
