

Engineering ideas
to help you grow

Established over 45 years Nicholson Machinery Ltd offers a wide range of onion equipment to suit short/intermediate and long day onions. Patented designs include market leading Field Toppers, Lifters, Windrowers, bin/bag and bulk loading Harvesters and our Top-Tailer for customers requiring a top quality finish.

Field Topper

Whether topping onions for fresh market or storage the patented Nicholson topper with its powerful suction and unique discharge leaves a cleaner crop reducing staining and infections.

Features

- High powered suction
- Suitable for green tops
- Cleaner cut to seal quickly reducing fungal ingress
- Discharges into tractor wheeling's reducing staining

Options

- Available in widths to suit all bed configurations
- Fold up models for easy transportation
- Automatic depth control

Lifter/Windrower

Regarded as the most important part to harvesting the Nicholson Windrowers lift and clean the crop on the Star-Lifter system avoiding damage on the onions and stress on the web bars, low drop reduces damage from ground impact. Unique for growers with stones and hard lumps a powered tiller leaves a soft bed of soil to further reduce damage particularly when the onions are picked up by the harvester.

Features

- 1,2 & 3 row versions
- Star-Lifter pick up system
- Variable speed drives
- Ideal for fresh market and storage onions

Options

- Powered soil tiller
- Various widths available
- Auto depth control

Harvesters

Harvesters produced for fresh market and storage onions for bulk loading, box filling and bagging all with Nicholson Star-Lifter pick up system.

Features

- 4 position inspection/grading area
- Variable speed hydraulic drives
- 30 degree steering axle

Options

- Various row widths
- Low trailers with steering axles
- Top-Tailer unit
- Levelling axle

Top Tailer

The Patented Nicholson Top -Tailer is recognised by packers to be the market leader meeting the exact demands from customers requiring a top quality finish with minimal damage.

The New 2017 version offers even more flexibility than the current models.

Features

- Low noise and dust
- Accurate topping
- Adjustable for fresh market and storage onions
- Models from 3 to 25 TPH

Options

- Steel and rubber pre-cleaning coils
- Infeed/pre-inspection variants available
- Suitable for red beets
