## Magnapunch 2.0

### Heavy-duty punch

Are you fed up of wasted paper...wasted printing...wasted time?

The new higher capacity GBC® Magnapunch 2.0 is the answer. Introducing truly faultless paper punching! Evolutionary edge detection and a comprehensive LCD interface deliver real-time error reporting and set up instructions to keep operators and productivity up to speed and ensure that your documents are punched right the first time and every time.

No complicated set-ups - No punching errors - No waste - No missed deadlines.

## Features and benefits

- Full color interactive LCD

Push button set-up instructions and real-time error reporting take the guesswork out of operation.

- Evolutionary Edge Detection Technology

Virtually eliminate mis-punches before they happen thanks to an early warning system.

- Continuous Half-Second Punch Cycle

A high speed, continuous-duty motor punches up to 49,000 sheets per hour.

Ideal for high volume, high speed punching.

- 13 High Capacity Interchangeable Dies

With up to 70% higher punch capacity and dies which install quickly without tools, Magnapunch 2.0 meets all your punching requirements.

- Easy-to-Use Edge Guide and Clear Front Window

Operators maintain accuracy, visibility and control at all times.

## Interchangeable die sets

Choose the perfect binding style every time. Interchangeable die sets let you change punch patterns without changing machines. It's fast and easy. Dies are labeled for quick identification, slide easily in and out, and lock in place – no tools or levers required. Disengageable pins let you alter patterns and tailor dies for smaller-sized sheets.

### Spine compatibility
