Programming manual

IMPRESSIONUM

Technical data originate from our Wire product line managed by
J. Drouet, CTSA-Geneva.

Typesetting and production by
Edipresse Imprimeries Réunies s.a. / Renens.

**0. General table of contents
Using the manual**

1. ISO language - Introduction

2. ISO language - G functions

3. ISO language - M functions

**4. ISO language - Special
programming**

5. ISO language: Custom macro B

6. Command words

7. CT-Expert

8. Boot Loader

9. CT-Graphic preview

General table of contents

0. Table of contents

| | |
|------------------------------|-----|
| - Using the manual | 0.8 |
| - Special case : ROBOFIL 380 | 0.8 |

1. ISO language - Introduction

| | |
|------------------------------------------------------------|-----|
| - Systems of coordinates | 1.3 |
| - Dimension words | 1.4 |
| - Use of decimal point | 1.6 |
| - Minimum angular increment | 1.6 |
| - Recommendations on the sequences of G and M instructions | 1.6 |

2. ISO language - G functions

| | |
|----------------------------------------------|------|
| ISO language - G functions | 2.3 |
| - Numerical index | 2.3 |
| - Modal commands | 2.5 |
| - Non-modal commands | 2.7 |
| Modal commands | 2.8 |
| - Move functions | 2.8 |
| - Mode selection | 2.12 |
| - Offset programming | 2.16 |
| - Taper programming | 2.22 |
| - Changing the direction of wire inclination | 2.26 |
| - Changing the angle of wire inclination | 2.27 |
| - Special tapering | 2.29 |
| - Programming of an attachment | 2.32 |
| Non-modal commands | 2.33 |
| - Program execution | 2.33 |
| - Measuring | 2.40 |
| Supplementary measuring cycles | 2.46 |
| - Corner Cycle | 2.48 |
| - Align Edge Cycle | 2.49 |
| - External Middle Cycle | 2.50 |
| - External Centering Cycle | 2.51 |
| - Holes Alignment Cycle | 2.52 |

3. ISO language - M functions

| | |
|----------------------------------------------------------|------|
| Numerical index and description of M functions | 3.3 |
| The M70 retrace function | 3.10 |
| - Example of application | 3.10 |
| - Determination of retrace memory area | 3.10 |
| The «Scrap remaining/cutting off of attachment» function | 3.11 |
| - Examples | 3.12 |
| M11 function | 3.13 |
| Side door management (option) | 3.13 |

4. ISO language - Special programming

| | |
|--------------------------------------------------------------------|------|
| The sub-program (M98 - M99) | 4.3 |
| - Format of a sub-program | 4.3 |
| - Sub-program execution | 4.4 |
| - Special uses of sub-programs | 4.5 |
| The corner recess function | 4.7 |
| - Programming | 4.7 |
| - Example of programming | 4.8 |
| - Précautions | 4.9 |
| The corner rounding function (G48 - G49) | 4.10 |
| - Programming | 4.10 |
| - Specifying the radius of the arc | 4.10 |
| - Example of programming | 4.11 |
| - Precautions | 4.11 |
| Conversion/copy functions (M98) | 4.12 |
| - Rotation/copy | 4.14 |
| - Scale/copy | 4.15 |
| - Mirror/copy | 4.16 |
| - Repetitive rotation/copy | 4.17 |
| - The centre of the conversion/copy commands | 4.19 |
| The reverse/copy function (M96 - M97) | 4.20 |
| - Programming | 4.21 |
| - Examples of Programming | 4.22 |
| - Precautions | 4.23 |
| Special taper programming | 4.24 |
| - Independent upper and lower corner radii | 4.24 |
| - Deviation vector | 4.24 |
| - Arc deviation vector | 4.25 |
| - Specifying the angle of wire inclination in an independent block | 4.26 |
| - Specifying the height of the secondary surface | 4.27 |
| - General precautions | 4.28 |
| Taper machining: specifying upper and lower shapes | 4.29 |
| - Outline | 4.29 |
| - Programming | 4.29 |
| - Examples of programming | 4.33 |
| - Selecting the machining mode | 4.34 |
| - Precautions when specifying upper and lower shapes | 4.34 |

5. ISO language: Custom macro B

| | |
|------------------------------------------------|------|
| General | 5.3 |
| Variables | 5.4 |
| - Variable expressions | 5.4 |
| - Quoted variables | 5.4 |
| - Undefined variables | 5.5 |
| - Displaying and setting variables | 5.6 |
| Types of Variables | 5.7 |
| - Local variables: #1 to #33 | 5.7 |
| - Common variables: #100 to #149, #500 to #531 | 5.7 |
| - System variables | 5.7 |
| Arithmetic commands | 5.12 |
| - Definition and substitution of variables | 5.12 |

| | |
|----------------------------------------------------|------|
| - Addition | 5.12 |
| - Multiplication | 5.12 |
| - Functions | 5.12 |
| - Combining arithmetic operations | 5.14 |
| - Modifying the arithmetic sequence | 5.14 |
| - Precision | 5.15 |
| - Notes on reduced precision | 5.16 |
| Control commands | 5.17 |
| - Branching (GOTO) | 5.17 |
| - Iteration (WHILE) | 5.19 |
| Creating and registering a custom macro body | 5.23 |
| - Creating a custom macro body | 5.23 |
| - Registering a custom macro body | 5.23 |
| - Macro and CNC statements | 5.24 |
| Commands that call macros | 5.27 |
| - Calling a macro locally (the G65 command) | 5.27 |
| - Calling a macro globally (the G66 command) | 5.30 |
| - Multiple calls | 5.30 |
| - Multiple global calls | 5.31 |
| - Calling macros using G commands | 5.31 |
| - Calling subprograms using M commands | 5.33 |
| - Calling subprograms using T commands | 5.34 |
| - The position of the decimal point in an argument | 5.34 |
| - The differences between the M98 and G65 commands | 5.35 |
| - Custom macro levels and local variables | 5.35 |
| Relationships with other functions | 5.36 |
| Special codes and commands used in custom macros | 5.38 |

6. Command words

| | |
|----------------------------------------------------------------|-----|
| Command words | 6.3 |
| - Movements and machining in the Machine system of coordinates | 6.4 |
| - Movements and machining in the Part system of coordinates | 6.4 |
| - Predefined movements | 6.5 |
| - Technologies and machining settings | 6.5 |
| - Auxiliary functions | 6.6 |
| - Execution of programs | 6.6 |

7. CT-Expert

| | |
|---------------------------------------------|-----|
| Introduction | 7.3 |
| Utilization of a sequence in an ISO program | 7.4 |
| File management | 7.4 |
| Basic menu | 7.4 |
| CT-Expert user interface | 7.4 |
| - Keyboard | 7.5 |
| - Programmable keys (soft keys) | 7.5 |
| Automatic construction of a sequence | 7.6 |
| - Principle of operation | 7.6 |

| | |
|--------------------------------------------------------|------|
| - Questionnaire | 7.6 |
| - Display of result | 7.7 |
| - Modification of result | 7.7 |
| - Saving of the result | 7.7 |
| Manual construction of a sequence | 7.8 |
| - Principle of operation | 7.8 |
| - Specification of the machining context | 7.8 |
| - Editing of the sequence | 7.9 |
| - Modification of the result | 7.9 |
| - Saving of the result | 7.9 |
| Standard sequences | 7.10 |
| - Principle of operation | 7.10 |
| - Specification of the machining context | 7.10 |
| - Editing of the sequence | 7.10 |
| - Modification of the result | 7.11 |
| - Saving of the result | 7.11 |
| - Saving of the sequence in the standard sequences | 7.11 |
| - Deletion of the sequence from the standard sequences | 7.11 |
| Rereading of a sequence | 7.11 |
| - Principle of operation | 7.11 |
| Generation of a command file | 7.12 |
| - Principle of operation | 7.12 |
| - Conditions concerning the part-program | 7.12 |
| - Execution parameterization | 7.12 |
| - Multiple parts | 7.13 |
| Rectangular layout | 7.13 |
| Random layout | 7.13 |
| Radial layout | 7.14 |
| Part by Part Machining | 7.14 |

8. Boot Loader

| | |
|------------------------------------------------|------|
| Introduction | 8.3 |
| General | 8.3 |
| Activation of Boot Loader | 8.4 |
| Loading the update diskettes | 8.5 |
| Execution of the update | 8.6 |
| Anomalies - Interpretation of error messages | 8.7 |
| Summary of error messages | 8.8 |
| Continuity of production | 8.9 |
| Replacement of Boot Loader itself | 8.10 |
| - Anomalies - Interpretation of error messages | 8.11 |
| - Continuity of production | 8.11 |

9. CT - Graphic preview

| | |
|--------------------------------------------|------|
| Introduction | 9.3 |
| - Purpose and functioning | 9.3 |
| - Hierarchy of the screen pages | 9.3 |
| - Activation of the Graphic preview module | 9.3 |
| Screen page Graphic Preview (selection) | 9.4 |
| Execution procedure | 9.6 |
| - Syntax check | 9.6 |
| - Loading into memory | 9.6 |
| - Drawing | 9.7 |
| - Function keys | 9.7 |
| Graphic Preview page | 9.8 |
| Context page | 9.10 |
| Advanced Options page | 9.12 |
| Draw Parameters page | 9.14 |
| Alternative representations | 9.16 |
| - Isometric display (XYZ) | 9.16 |
| - Full Screen page | 9.16 |
| Show ISO page | 917 |
| Log File page | 918 |
