

# OPERATING INSTRUCTION

**MAHO**

CNC 432

---

## 1. COMMISSIONING

---

1.1	Startup of machine and CNC control .....	1-03
1.2	Seeking reference points of machine .....	1-05
1.2.1	Peculiarities - seeking ref.points .....	1-07
1.3	Seeking reference point of tool magazine .....	1-08
1.4	Deletion of error messages .....	1-09
1.5	Keyboard .....	1-10
1.5.1	Softkeys .....	1-11
1.5.2	Cursor control .....	1-12
1.6	Software version display .....	1-12
1.7	Saving machine constants .....	1-13
1.8	MEMORY LOCK keyswitch .....	1-13

---

## 2. MANUAL OPERATING MODE

---

2.1	The MANUAL image .....	2-03
2.2	MANUAL operation (MAN.OPER.) .....	2-04
2.2.1	Setting the traversing rate .....	2-04
2.2.2	Continuous jogging (JOG CONTINUE) .....	2-05
2.2.2.1	Jogging skip .....	2-06
2.2.2.2	Continuous operation .....	2-06
2.2.3	Incremental traversing (JOG STEP) .....	2-07
2.3	Working spindle key-held operation .....	2-08
2.4	Remote panel .....	2-08

2.5	<b>Metric and Inch system</b> .....	2-11
2.6	<b>Reference point search</b> .....	2-12
2.7	<b>Part zero point</b> .....	2-13
2.7.1	Setting the part zero point (RESET AXIS) .....	2-13
2.7.1.1	Setting the part zero point to 0 .....	2-15
2.7.1.2	Setting the part zero point to a specific value .....	2-16

---

### 3.      P A R T    M A C H I N I N G    P R O G R A M M I N G

---

3.1	<b>Operator guidance and auxiliary graphics</b> .....	3-03
3.1.1	Selection of operator guidance .....	3-05
3.1.2	Selection of auxiliary graphics .....	3-06
3.2	<b>Manual program input into inoperable machine</b> ...	3-07
3.2.1	Principal rules for program input .....	3-07
3.2.2	Main program input .....	3-08
3.2.3	Subprogram input .....	3-11
3.2.4	Mask records .....	3-13
3.2.4.1	Mask record input .....	3-13
3.2.5	Parameter E .....	3-14
3.2.5.1	Parameter E definition .....	3-14
3.2.5.2	Arithmetic operations with parameters E .....	3-15
3.2.6	Program protection .....	3-17
3.3	<b>Manual program input during a running program</b> ..	3-18
3.4	<b>Single record programming</b> .....	3-19
3.4.1	TEACH-IN MDI mode .....	3-19
3.4.2	TEACH-IN PLAYBACK mode .....	3-22
3.4.2.1	Teach-in method .....	3-23

3.4.2.2	Playback method .....	3-25
3.4.2.3	Re-entering the TEACH-IN PLAYBACK mode .....	3-28
<b>3.5</b>	<b>Stored zero offsets .....</b>	<b>3-30</b>
3.5.1	Input and modification of zero offsets .....	3-33
3.5.2	Activating a zero offset .....	3-34
3.5.3	Checking zero offsets .....	3-34
3.5.4	Deleting one zero offset .....	3-35
3.5.5	Deleting all zero offsets .....	3-36

---

#### 4. TOOL PROGRAMMING

---

<b>4.1</b>	<b>Tool data (TOOL OFFSETS) .....</b>	<b>4-03</b>
4.1.1	Seeking a tool T .....	4-04
4.1.2	Input and modification of tool data .....	4-05
4.1.3	Checking tool data .....	4-06
4.1.4	Deletion of offsets of one tool .....	4-07
4.1.5	Deletion of offsets of all tools .....	4-08
4.1.6	Input of magazine position numbers .....	4-09
<b>4.2</b> X	<b>Tool life .....</b>	<b>4-10</b>
4.2.1	Input and modification of tool life .....	4-11
4.2.2	Checking tool lives .....	4-13
4.2.3	Deletion of tool life of one tool .....	4-14
4.2.4	Deletion of tool life of all tools .....	4-15
4.2.5	Release after tool life expiration .....	4-16
4.2.5.1	Tool release on machines without tool changer ..	4-16
4.2.5.2	Tool release on machines with tool changer .....	4-17
4.2.5.3	Release of an inhibited tool T .....	4-17
<b>4.3</b> X	<b>Spare tools .....</b>	<b>4-19</b>

4.3.1	Input and modification of spare tools .....	4-20
4.3.2	Checking spare tools .....	4-22
4.3.3	Deletion of one spare tool .....	4-23
4.3.4	Deletion of all spare tools .....	4-24
<b>4.4</b> X	<b>Tool breakage monitoring .....</b>	<b>4-25</b>
4.4.1	Input and modification of data for tool breakage monitoring .....	4-26
4.4.2	List of tool lengths A measured with active tool breakage monitoring (TOOL LENGTH MONITOR)..	4-28
4.5	<b>The DNC tool memory .....</b>	<b>4-30</b>

---

**5. PROGRAM TEST**

---

5.1	X <b>The program test runs (TESTRUN-1, TESTRUN-2, TESTRUN-4) .....</b>	<b>5-03</b>
5.1.1	Execution of a program test run .....	5-04
5.1.2	Abortion of a program test run .....	5-06
5.1.3	Re-entering a program test run .....	5-06
5.2	/ <b>The graphic test runs (TESTRUN-5, TESTRUN-6, TESTRUN-7) .....</b>	<b>5-07</b>
5.2.1	Prerequisites for graphic test runs .....	5-08
5.2.1.1	Window definition .....	5-08
5.2.1.2	Blank definition .....	5-10
5.2.2	List of graphic parameters .....	5-12
5.2.2.1	Calling the graphic parameter list .....	5-12
5.2.2.2	Explanation of entries in the graphic parameter list .....	5-14
5.2.2.3	Editing the graphic parameter list .....	5-16
5.2.3	Calling the graphic test runs .....	5-16
5.2.4	TESTRUN-5 (2.5D plotter graphics) .....	5-18
5.2.4.1	Execution of graphic test run TESTRUN-5 .....	5-20
5.2.5	TESTRUN-6 (3D plotter graphics) .....	5-20

5.2.5.1	Execution of graphic test run TESTRUN-6 .....	5-21
5.2.6	TESTRUN-7 (simulation graphics) .....	5-22
5.2.6.1	Execution of graphic test run TESTRUN-7 .....	5-23
5.2.7	The graphic cursor .....	5-24
5.2.8	Calling off graphic test runs .....	5-26

---

## 6. PROGRAM MODIFICATION

---

6.1	Release of protected programs .....	6-03
6.2	Search routines .....	6-05
6.2.1	Address search routine .....	6-05
6.2.2	Word search routine .....	6-07
6.3	Modification of active main program .....	6-08
6.3.1	Seeking the active main program .....	6-08
6.3.2	Seeking the program record to be modified .....	6-09
6.3.3	Modification, insertion and deletion of program words .....	6-10
6.3.4	Deletion of a program record .....	6-11
6.3.5	Insertion of a program record .....	6-12
6.3.6	Renumbering program records (RENUM-N) .....	6-13
6.3.7	Modification of program number (EDIT-ID) .....	6-13
6.4	Modification of the nonactive main programs ....	6-14
6.4.1	Seeking the nonactive main program .....	6-14
6.4.2	Seeking the program record to be modified .....	6-16
6.4.3	Modification .....	6-17
6.5	Modification of subprograms .....	6-18
6.5.1	Seeking the subprogram .....	6-18
6.5.2	Seeking the program record to be modified .....	6-19
6.5.3	Modification .....	6-19

<b>6.6</b>	<b>Deletion of programs</b> .....	6-20
6.6.1	Deletion of one main program .....	6-20
6.6.2	Deletion of all main programs .....	6-22
6.6.3	Deletion of one subprogram .....	6-23
6.6.4	Deletion of all subprograms .....	6-24

---

**7. PROGRAM RUN**

---

<b>7.1</b>	<b>Feed correction (F-OVR)</b> .....	7-03
<b>7.2</b>	<b>Spindle speed correction (S-OVR)</b> .....	7-03
<b>7.3</b>	<b>Program and record search for part machining (BLOCK SEARCH)</b> .....	7-05
7.3.1	Program search for part machining .....	7-05
7.3.2	Program record search for part machining .....	7-08
7.3.3	Seeking a program record in a repeat segment ...	7-10
7.3.4	Seeking a program record in the subprogram .....	7-12
<b>7.4</b>	<b>Skipping masked records</b> .....	7-14
<b>7.5</b>	<b>SINGLE mode (single record program run)</b> .....	7-15
<b>7.6</b>	<b>AUTO mode (automatic program run)</b> .....	7-18
<b>7.7</b>	<b>Program stop</b> .....	7-21
<b>7.8</b>	<b>Tool changing by hand</b> .....	7-21
<b>7.9</b>	<b>Interruption and abortion of program run</b> .....	7-23
7.9.1	Interruption of program run .....	7-23
7.9.2	Automatic repositioning and repetition of interrupted program record (REPOS) .....	7-24
7.9.3	Abortion of fixed cycle (CLEAR CYCLE) .....	7-27
7.9.4	Abortion of program run .....	7-28
7.9.5	Restarting a program .....	7-29

7.10	X List of parameters E (PARAMETERS) .....	7-30
7.11	List of points P (POINTS) .....	7-33
7.12	Turning off machine and CNC control .....	7-36

---

## 8. DATA TRANSFER

---

8.1	General information .....	8-03
8.2	Readin and readout of programs .....	8-04
8.2.1	Readin of programs from an external data carrier	8-05
8.2.1.1	Readin of all programs .....	8-06
8.2.1.2	Readin of one program .....	8-07
8.2.2	Readout of programs onto an external data carrier	8-08
8.2.2.1	Readout of all programs .....	8-08
8.2.2.2	Readout of one program .....	8-09
8.3	X Readin and readout of other data .....	8-10
8.3.1	Readin of data .....	8-10
8.3.2	Readin and readout of tool data .....	8-11
8.3.3	Readin and readout of tool life .....	8-12
8.3.4	Readin and readout of spare tools .....	8-13
8.3.5	Readin and readout of data for tool breakage monitoring .....	8-14
8.3.6	Readout of tool lengths A measured with active tool breakage monitoring .....	8-15
8.3.7	Readin and readout of zero offsets .....	8-16
8.3.8	Readin and readout of parameters E .....	8-17
8.3.9	Readin and readout of points P .....	8-18
8.3.10	Readin and readout of parameters for plotter graphics (and simulation graphics) .....	8-19
8.4	Readin and readout of tools when working with the DNC tool memory .....	8-20

8.5	X BTR readin of programs .....	8-21
-----	--------------------------------	------

---

9.	<b>D I A G N O S I S</b>	
----	--------------------------	--

---

9.1	Error diagnosis .....	9-03
9.2	Diagnostic menu .....	9-05
9.3	Software version and configuration check .....	9-06
9.4	Hardware check routine (POWER-UP CHECK) .....	9-06
9.5	X Diagnostic mode .....	9-07
9.5.1	Calling the diagnostic mode .....	9-07
9.5.2	CONTR.TELET.MOD.test program .....	9-10
9.5.3	CENTR.PROC.MOD. test program .....	9-11
9.5.4	PROM TEST program .....	9-11
9.5.5	32 INP./OUTP.MOD. test program .....	9-12
9.5.6	DRIVE MODULES test program .....	9-12
9.5.7	GRAPH.MOD. test program .....	9-13
9.5.8	SERVICE ONLY test program .....	9-14
9.5.9	Calling off the diagnostic mode .....	9-14

---

10.	<b>M I S C E L L A N E O U S</b>	
-----	----------------------------------	--

---

10.1	Machine constants .....	10-03
10.1.1	Checking of machine constants .....	10-03
10.1.2	Input and modification of machine constants with- out unlocking the machine constant memory .....	10-04
10.1.3	Input and modification of machine constants after unlocking the machine constant memory .....	10-06
10.1.4	Readin of machine constants .....	10-08

10.1.5	Readout of machine constants .....	10-09
10.2	Checking the signal status of the inputs and outputs of the CNC control .....	10-10
10.3	Checking the memory occupancy .....	10-12
10.4	Explanation of texts and abbreviations used in the screen pictures and on the keys of the CNC control operating panel .....	10-13
10.5	Function of CNC control operating panel keys ....	10-26
