Issue Description

License validation may fail during SmartGripper Add-in installation in RobotStudio 2025.3 and later versions.

Root Cause

RobotStudio 2025.3 introduces stricter license validation rules. Virtual license bundled with the Smart-Gripper Add-In (v3.56) does not comply with these new requirements.

Recommended Action

Install Smart Gripper Add-in via RobotStudio 2025.2 or earlier versions.
