

SmartCraft

INTELLIGENT VESSEL CONTROL & CONNECTIVITY

PERFECT DAYS HAPPEN WHEN EVERYTHING WORKS IN TOTAL HARMONY

The weather, the water, the company, the boat and the engine. Everything working in your favor. Days like these make it easy to get lost in the moment. They remind you why you fell in love with the water in the first place. Mercury® SmartCraft® digital technologies help you enjoy every little thing. Because time flies when you're out here, and it stands still while you're waiting to return.

THE POWER TO DO MORE

Easier. Faster. Smoother. Safer. More efficient. More controlled. More insightful. More fun. Mercury SmartCraft technologies refine the entire boating experience to ensure every day on the water reaches its full potential. From smart gauges and displays, to precise, ergonomic controls, to advanced safety and security solutions, SmartCraft is an exclusive suite of digital features seamlessly integrated with most Mercury engines, empowering boaters to do more.

STAY CONNECTED TO YOUR ENGINE LIKE NEVER BEFORE

Dive deeper, SmartCraft technologies act as a digital backbone for engine data and smart controls, enabling access to connected gauges, VesselView® compatible displays, mobile apps and other features that allow you to experience unprecedented performance and control.

Learn more at mercurymarine.com/smartcraft.

VESSELVIEW

A fully integrated data management system, Mercury VesselView lets boaters access more information on boat and engine functions than any other system in the industry. VesselView monitors up to six engines simultaneously, tracking rpm, speed, fuel flow and efficiency, temperature, trim, and more. Data is seamlessly transmitted onto compatible displays.

VESSELVIEW DISPLAYS

The intuitive VesselView display platform provides complete engine performance data and serves as a hub for operating SmartCraft digital technologies. With the exception of the 4" display, VesselView displays require a VesselView Link to access engine data. VesselView displays link onboard audio systems, digital switching, GPS chartplotters, radar and sonar—allowing boaters to replace gauges and manage everything from one screen.

SEE MORE. DO MORE.

9/7/5/4^{inch}
MULTI-FUNCTION DISPLAYS

UNLOCK INTUITIVE SMARTCRAFT FEATURES WITH VESSELVIEW

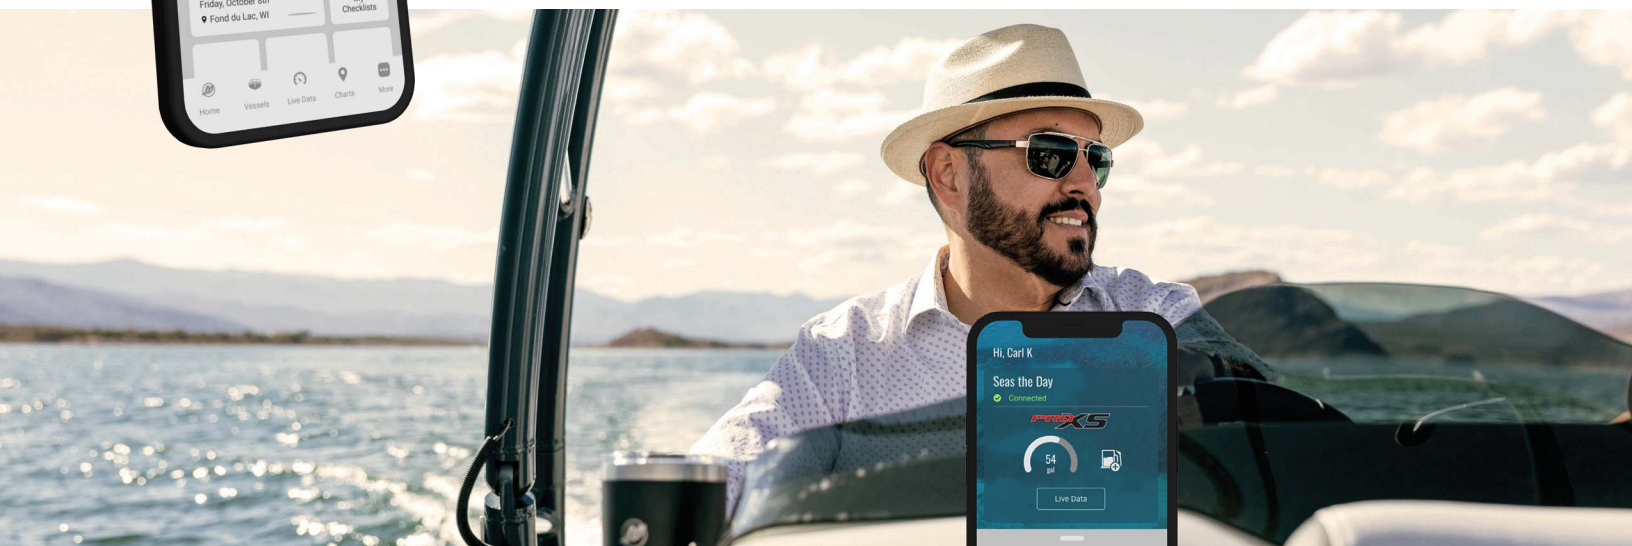

Easier everything, available at your fingertips. VesselView displays enable convenient access to many SmartCraft features, including advanced control technologies such as Active Trim, Smart Tow®, Troll Control, and Advanced Sound Control.

MERCURY MARINE APP

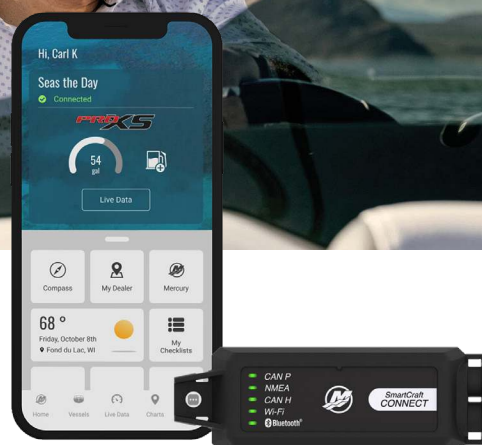

The Mercury Marine app is the perfect companion for every Mercury owner. Whether your boat is connected or not, the app brings helpful tools and information together in one easy place. When paired with SmartCraft® Connect or VesselView® Mobile, it lets you view key VesselView performance data right from your phone. The app also supports the Mercury Keyless System, giving you a simple, connected way to manage access to your boat. From tracking engine maintenance to finding a dealer and helpful boating tips, the Mercury Marine app makes life on—and off—the water easier. Available for iOS and Android devices.

INTEGRATE WITH LEADING DISPLAYS

SmartCraft Connect

SmartCraft Connect is a family of connectivity modules that lets you choose the level of digital connection that's right for you and your boat. From essential engine insights to advanced performance data, each SmartCraft Connect option links your Mercury engine to the Mercury Marine app—bringing helpful information, tools, and confidence right to your mobile device. When connected, you can access VesselView® performance data, fuel tracking, and more. For Avator™ outboards, SmartCraft Connect also enables battery tracking and visualized range estimates, helping you explore with confidence. One system, multiple ways to connect—designed to fit how you boat.

SELECT THE CORRECT SMARTCRAFT CONNECT PRODUCT BASED ON VESSEL AND ENGINE CONFIGURATION.

Level 1 – Mobile Only. *Available Now*

8M0173128: SmartCraft Connect, Under Cowl, Single Engine

8M0173129: SmartCraft Connect, Under Helm, Dual Engine

Level 2 – Navico Mobile and MFD. *Coming Soon*

8M0235016: SmartCraft Connect, Under Cowl, Single Engine

8M0235017: SmartCraft Connect, Under Helm, Single Engine

8M0235018: SmartCraft Connect, Under Helm, Multi-Engine

Level 3 – Garmin and Raymarine Mobile and MFD

8M0173694: SmartCraft Connect, Under Helm, Single Engine

8M0173703: SmartCraft Connect, Under Helm, Multi-Engine

SmartCraft compatibility is available for Mercury engines 2004 and newer, 40hp and above; 2022 and newer, 25hp and above. Features vary based on controls and engine models. All trademarks are the property of their respective owners.

DIGITAL GAUGES

Precision SC1000 and SC100 digital gauges provide engine performance data, including speed, rpm, trim, depth, alarms, water pressure, fuel flow and more. The SC1000 also enables many SmartCraft features, like convenient Troll Control and simple Smart Tow launches. They're perfect for a wide range of boat styles and engines, including single- or multi-engine configurations.

MORE DATA. MORE FLEXIBILITY. MORE VALUE.

MERCMONITOR

Delivering value and flexibility, MercMonitor digital gauges provide boaters with access to SmartCraft data and controls. A customizable multi-color LCD screen enables one-touch Smart Tow launch profiles and accurate Troll Control settings, as well as deep insights into engine performance, including temperature, depth, alarms, rpm, speed, water pressure, fuel flow and more. It's ideal for monitoring a wide range of outboard and sterndrive boats with single- or multi-engine platforms.

STAY IN COMPLETE COMMAND

Mercury has made it easier than ever to operate with smoothness and precision. SmartCraft-enabled engines handle like an extension of the captain – an eager, agile partner with a matching sense of adventure. When paired with advanced SmartCraft control systems, Mercury engines deliver an intuitive and truly premium driving experience.

MERCURY KEYLESS SYSTEM

No key. No fob. No hassle. The Mercury Keyless System eliminates the need to use physical keys to start your Mercury outboard. With the Mercury Keyless System, starting up your boat before your next adventure is as simple as pressing a button. With seamless integration for up to 4-engine installations, including control over remote battery switches and the ability to unlock your vessel from a mobile device using the Mercury Marine app, setting out on your next adventure is as simple as pressing a button.

DIGITAL THROTTLE & SHIFT

Next Generation Digital Throttle & Shift (DTS) integrates SmartCraft® digital technologies into the most advanced suite of electronic remote controls in the marine space. Compatible with all Mercury DTS-enabled sterndrive, inboard, diesel and outboard engines, the Next Gen DTS system delivers smooth, quiet shifting and instant throttle response. With integrated Active Trim and other captain-friendly features, DTS panel- and console-mount controls enable an effortless driving experience.

SINGLE- AND MULTI-ENGINE APPLICATIONS

ULTRA-RESPONSIVE.
ZERO HESITATION.

JOYSTICK PILOTING

Intuitive, precise control of steering, throttle and shift at your fingertips. Joystick Piloting provides 360° steering control, enabling pinpoint moves sideways, forward, backward, diagonally or rotating in place. It makes maneuvering in tight quarters easier than ever, ensuring agile handling around the dock. Skyhook® holds a boat's position at the press of a button, acting as a digital anchor while waiting at the fuel dock or for a bridge to open. Joystick Piloting is available for single and multi-outboard or sterndrive setups, inboards, Zeus® pod drives, and single-engine pontoon applications.

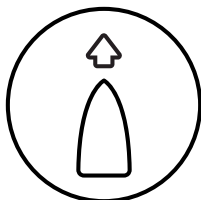

360° JOYSTICK CONTROL

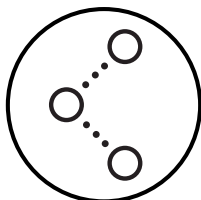

JOYSTICK PILOTING FEATURES

Joystick Piloting makes it easy for any boater to pilot like a seasoned pro. Around the docks, Joystick Piloting makes steering a boat as simple as pushing the joystick whichever way you want to go. In open water, advanced positioning and control features enhance just about any boating activity.

HEADING

Using an integrated digital compass, Heading automatically maintains a boat's direction.

ROUTE

A fully integrated autopilot, Route navigates the vessel to an active waypoint or route in a compatible chartplotter.

SKYHOOK®

Maintains a boat's position and heading, keeping the boat auto-anchored in place at the press of a button.

POSITION HOLD

Unlocks heading and maintains position, allowing the boat to point in whatever direction the winds and currents dictate.

HEADING HOLD

Maintains heading and unlocks position, allowing winds and currents to move the boat – perfect for controlled drifts.

JOYSTICK STEERING FOR SINGLE-ENGINE VESSELS

Joystick Steering makes driving a single-engine boat at low speeds as easy as pushing the joystick forward or backward to move ahead or in reverse, and twisting it left or right to turn. By combining throttle, shifting and steering into a single one-handed control, you're free to position yourself comfortably while docking, loading on a trailer or maneuvering in close quarters. Available for Verado® outboards with Electric Steering.

TILLERS

Mercury SmartCraft-enabled tillers deliver total hands-on command. The Mercury Big Tiller features power steering for ultimate control, as well as optional Digital Throttle & Shift, enabling smooth shifting and acceleration. SmartCraft Troll Control – available on the 150hp+ Mercury Big Tiller and standard on 40 to 115hp tillers – refines speed settings in increments as precise as 10 rpm.

SMARTCRAFT-ENABLED TROLL CONTROL

± 10 RPM INCREMENTS

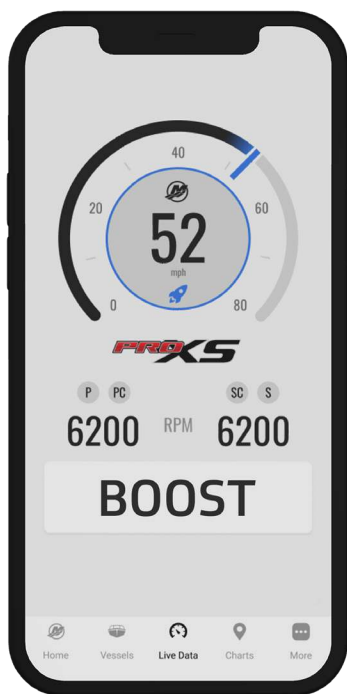

WHERE POWER MEETS INTELLIGENCE

SmartCraft technologies keep things simple. Time on the water is most enjoyable when you aren't fidgeting with the trim, repeatedly dropping skiers or alternating between too many rpm and too few.

SmartCraft digital features take the guesswork out of boating and keep the focus on the fun.

Learn more at mercurymarine.com/smartcraft.

BOOST

Unlock more performance from your Mercury outboard with Boost. A revised engine software calibration that improves mid-range acceleration by up to 21% percent, Boost gives you an extra burst of power in the middle of the powerband that helps you cruise more effortlessly or get a jump on your competition on the way to the next fishing spot. No prop or hardware changes are required.

CRUISE CONTROL

Pick a speed or rpm setting and maintain it with the press of a button.
Cruise Control is a smart, simple solution for boaters on the move.

SURF CONTROL

Digital Surf Control coordinates ballast, surf tabs and propulsion settings, ensuring the perfect wave for wakesurfers.

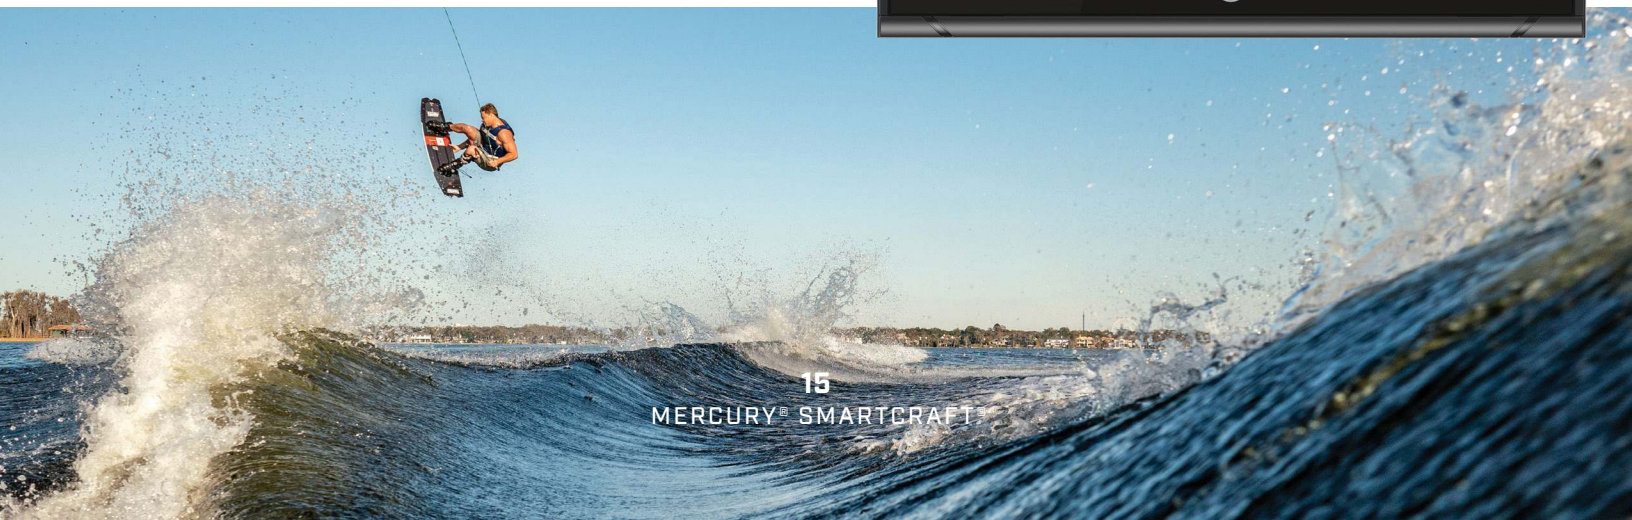

SMART TOW

Push-button perfection. Smart Tow® takes the guesswork out of getting riders up on their feet, allowing boaters to choose from five preset launch profiles or create up to eight customized profiles.

GET UP EASIER WITH ONE-TOUCH
CUSTOMIZABLE PROFILES

TROLL CONTROL

Simple and precise, digital Troll Control allows anglers to lock in and then adjust trolling speeds in increments as fine as 10 rpm at the push of a button.

ADVANCED SOUND CONTROL

With industry-exclusive Advanced Sound Control, boaters can use the VesselView interface to adjust the engine's exhaust tone, toggling between a quiet purr and a deep, sporty growl. Available on Mercury V8 and V10 Verado® outboards.

PROTECTION AND PEACE OF MIND

Keep your focus on the fun. SmartCraft technologies provide added safety and security, keeping boaters in their comfort zone.

Learn more at mercurymarine.com/smartcraft.

MOVING PROPELLER ALERT

With highly visible safety warnings displayed on the stern, MP Alert lights up to let swimmers know the engine has been started and the propeller is in motion. It can be added to any vessel with Digital Throttle & Shift controls, and it is particularly suited for use on vessels with Joystick Piloting and Skyhook.

1ST MATE

1st Mate® Marine Safety & Security System wearable fobs integrate with the SmartCraft system and a mobile app to enhance theft deterrence, deliver an alert with the location of the event if a passenger goes overboard, and provide engine cut-off switch functionality in the case of the captain going overboard.
