

# STORM WB

Vacuum Extruding Machine Storm WB

# STORM WB

## Use

- STORM WB suitable to apply **WATER BASED** paints on interior and exterior profiles, appropriate for lines that process high production volume batches.
- Thanks to its application technology, by vacuum head, it is possible to coat the profile, overspray free, even on four sides.
- Profiles up to 300 mm. wide

PROFILE

# STORM WB

# STORM WB

## Clear and pigmented water based paints

- H2O version in Moplen to facilitate the cleaning preserving the sturdiness. An automatic washing system can be added
- Machine equipped with automatic refilling system and double filtering switchable with by-pass for quick set-up change
- For four sides coating, on request, a device is available to minimize the paint quantity on the bottom side to considerably reduce the dirt on the previous in-line machines
- Drying by IR tunnel or by laminar air oven - IR - WJ at variable dwelling times
- Main cycle: primer, one coat or two coats, on interior and exterior matchboards, primer on MDF architectural mouldings

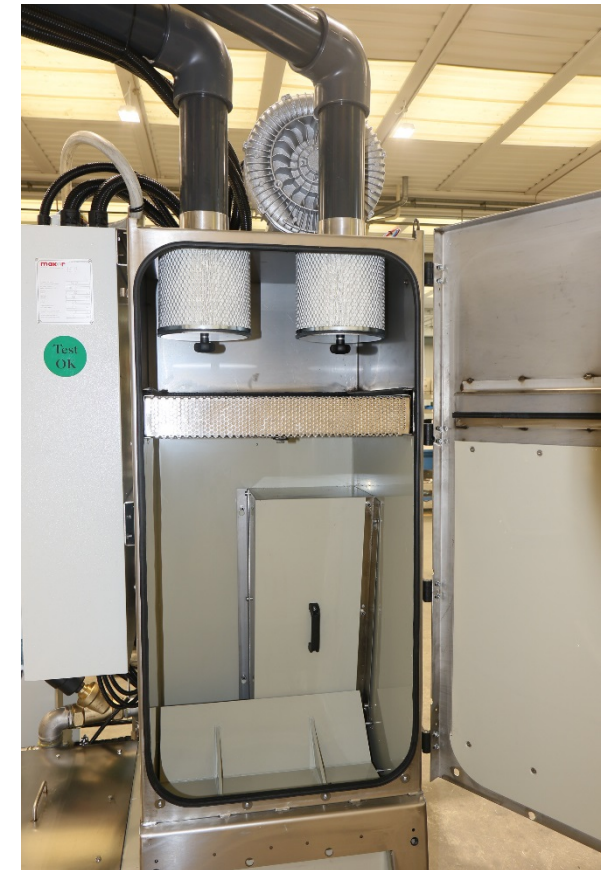

# STORM WB

- Moplen head, no stick material
- Air-product separation tower, in stainless steel, Moplen coated
- 

## PLUS

- Simple and fast maintenance and cleaning
- Coating materials do not mix with the paint.
- Stainless steel, long life guarantee

# STORM WB

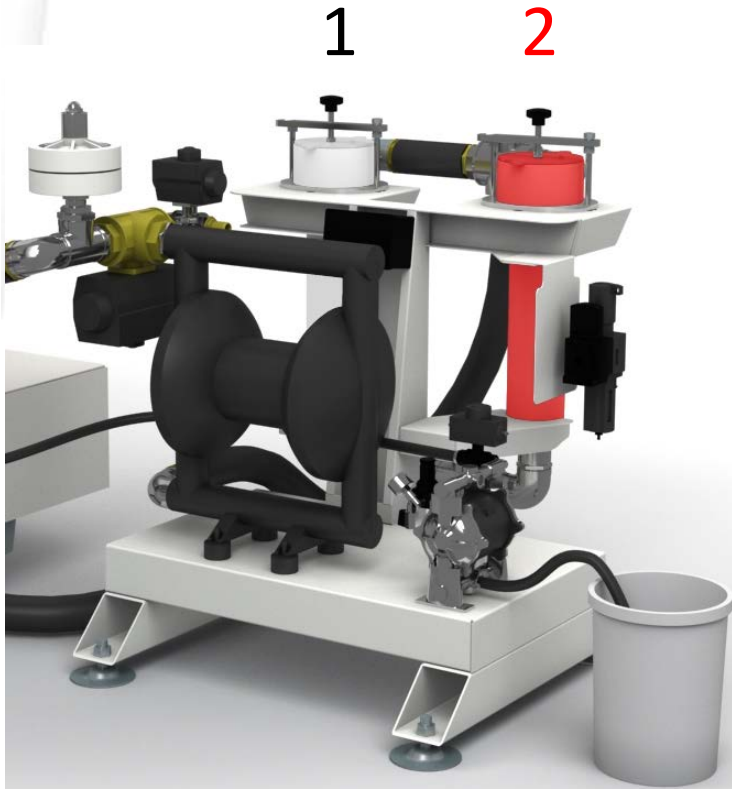

- Automatic filling system

## PLUS

- Production start speed
- No downtimes during production

PUMPING

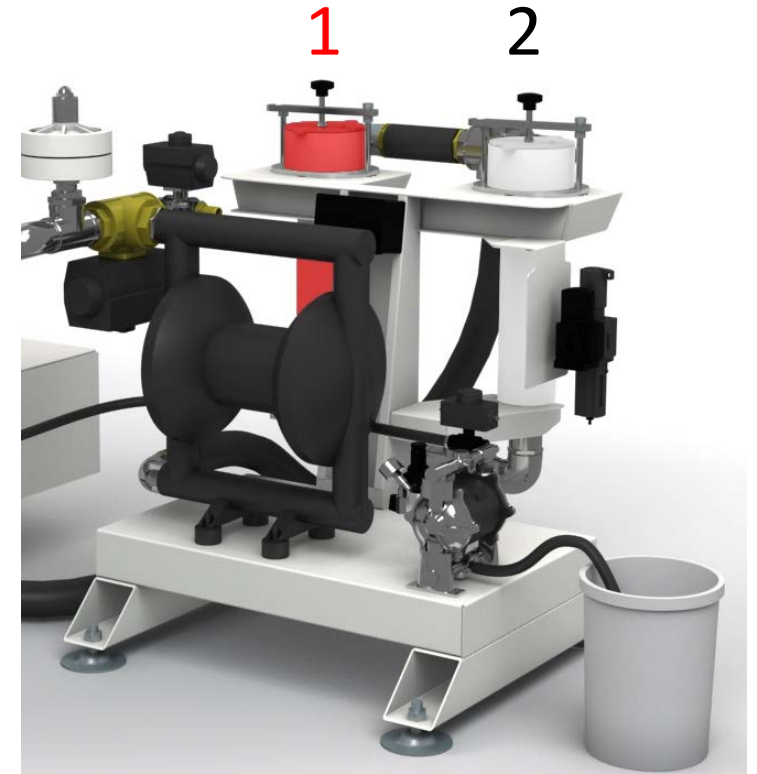

# STORM WB

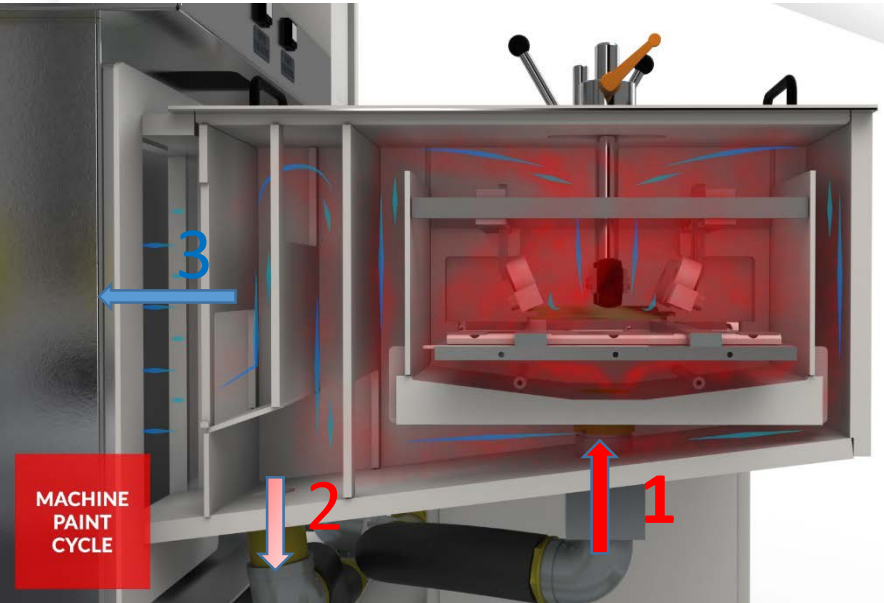

- Product double basket filter, in stainless steel, with switch valve **1 – 2**

## PLUS

- No downtimes during the production
- Cleaning of the filter (1 or 2 ), during the production

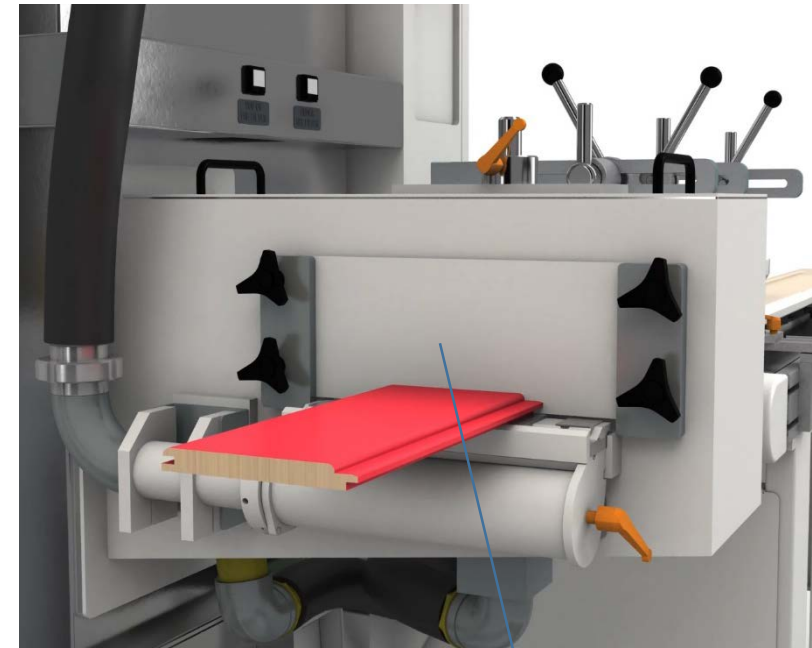

# STORM WB

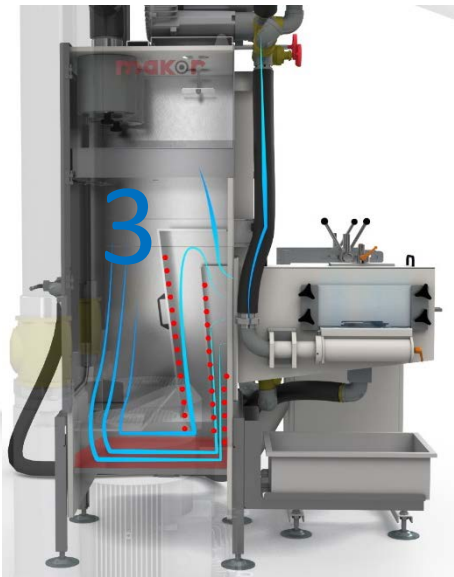

- Efficient product distribution **1**
- Product recovery **2**
- Air + paint in the separation tower **3**

## PLUS

- Uniform product distribution
- High quality coating on 3 and 4 sides
- 100 % paint recovery

OPT. Humidification system for particularly hot and dry environments

# STORM WB

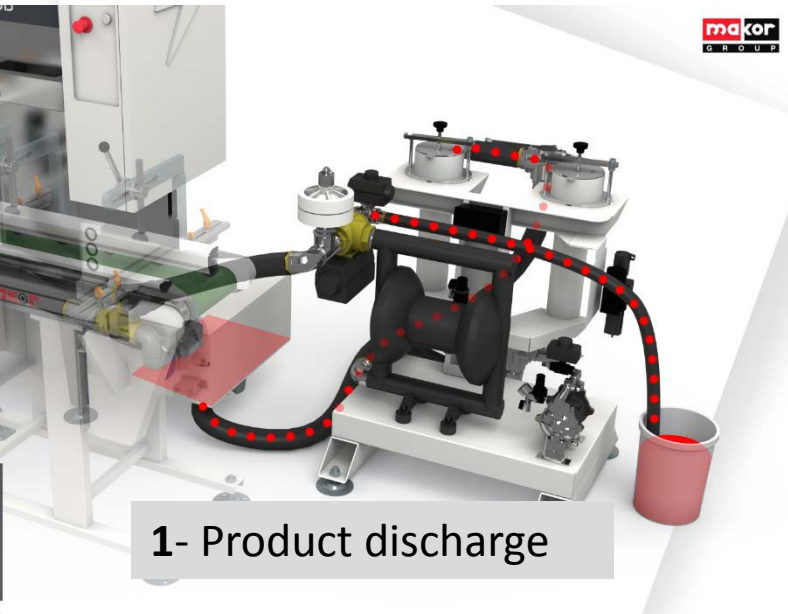

- Optional, blowing to coat the bottom side managed from control panel

## PLUS

- It is possible to apply small grams on the bottom side
- Reduction of residues on the subsequent transport systems

# STORM WB

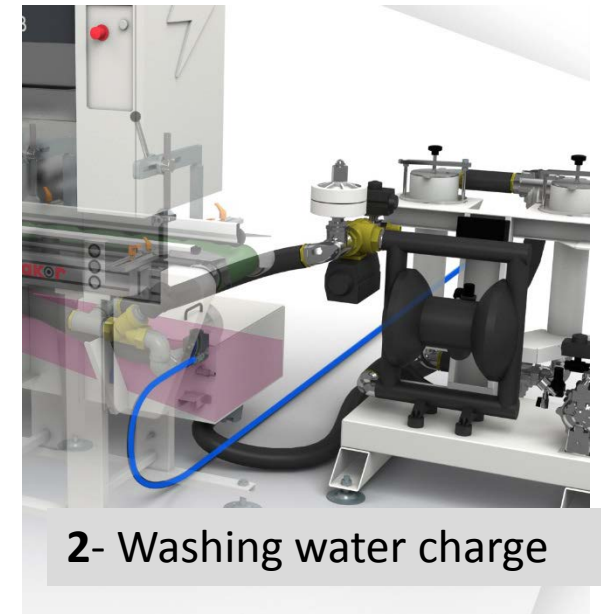

1- Product discharge

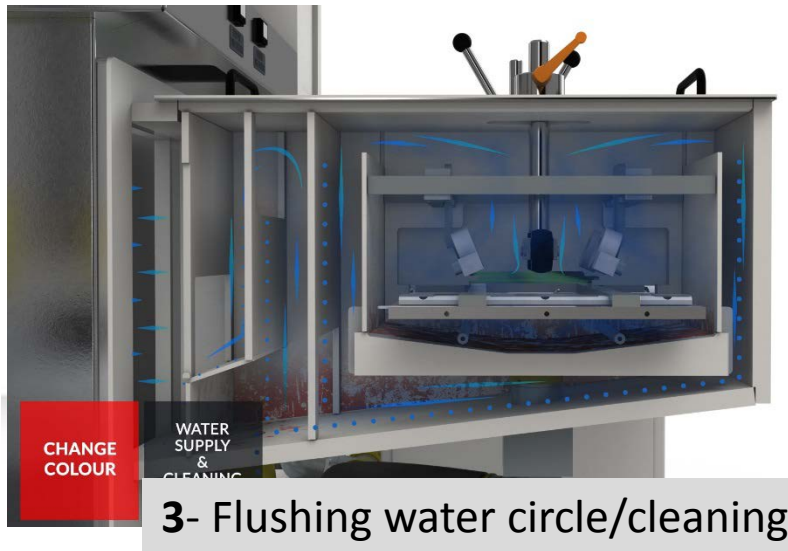

- Optional, automatic flushing and colour change

## PLUS

- Colour change reduction time
- Process automatization and standardization
- Quality guarantee

2- Washing water charge

3- Flushing water circle/cleaning

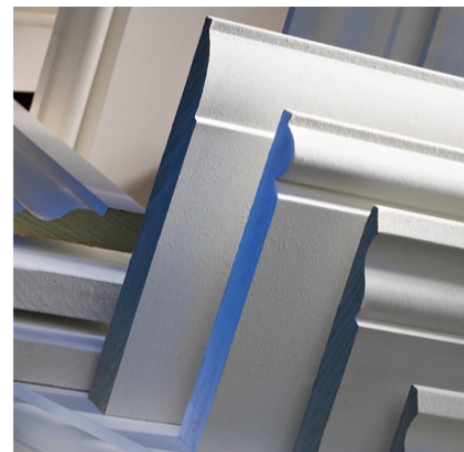

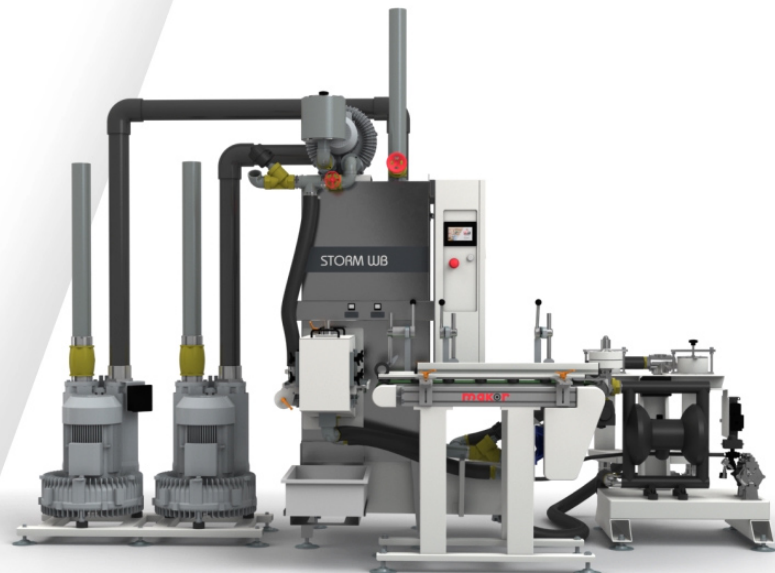

- 4- Flushing water discharge  
System ready to get new paint

DIRTY WATER DISCHARGE
