STAGING TABLE

5" STROKE OPTION ON RECEPTION CONVEYOR WORKING HEIGHT WITH AUTOMATIC RECEPTION HEIGHT ADJUSTMENT

BTWB3

WARRANTY 1 YEAR

CHARACTERISTICS

Built around a modular frame, BTWB3 Return Conveyors are available in 5 roller length models. All models incorporate the fast, simple and highly effective belt transfer system as follows.

OPERATING PRINCIPLE

- Its receiving rollers are equipped with a down stroke mechanism that is activated by detection of the trailing end of the panels exiting the equipment.
- Transfer belts nested in between the rollers are used to side-shift product to a set of motorized rollers parallel to your equipment.
- Once the panels have cleared the reception area, the receiving rollers return to their upper position ready to receive the next panel.
- Its standard receiving and return conveyor lengths are 5' and 15' respectively. Both sets of rollers can be extended to suit your application.

OPTIONS

AUTOMATIC HEIGHT ADJUSTMENT

- A motorized self-adjustment feature is allowed to automatically re-set the receiving conveyor's pass height while the table height on the sander is adjustable by the operator. The basic adjustment provides for 2" between the lowest and highest heights.

STAGING TABLE, MODEL STWB

- An optional staging table allows the operator to stage several parts at a time and to create a manageable work flow.
