CENTATEQ T-300 SERIES

STILES | HC
A HOMAG COMPANY

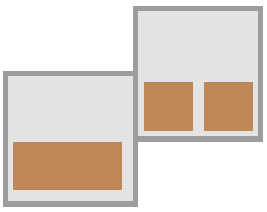

CNC Nesting Technology.
Trusted.
Traditional.
Versatile.
Fast.

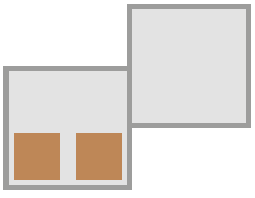

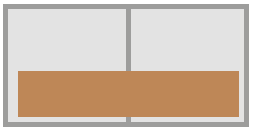

The **HOMAG CENTATEQ T-300** Series represents the latest generation of traditional CNC routers from the HOMAG Group. They offer quality machining capabilities for manufacturers of all sizes. From mid-sized shops to fully networked industrial production facilities, each **T-300** Series solution can be configured to meet your specific trade and production related needs.

Advantages

- **Twin 6x5' and 10x5'** table configurations
- **Twin 3, 4, or 5-axis spindle configurations**
- **(2) 14 position rotary tool changers**
- **(2) 18 position drill blocks**
- **Vertical/Horizonal drills and 0/90 blade**
- Available full line of **BENZ** aggregates
- **Matrix tables** and **vacuum system** standard
- **Flexible** table occupations
- **Rigid, reliable and repeatable** construction
- **Fast 141 meter/min rapid traverse**
- **Accurate high-speed** machining
- **Safe and Secure** machine enclosure
- Industry leading **service and support**

Independent Table Occupation: *for fast, flexible, and versatile production of different programs*

Synchronous Table Occupation*: for high-volume production of like programs*

Combined Table Occupation: *for machining long raw materials*
