PROUDLY MADE IN ITALY

IRIDE 206 UV

Spraying machine

Perfection of finishing

Compliant with anti-pollution and environmental protection standards, it allows spraying, in automatic and in-line, of UV ray photosensitive products on mouldings, pictures frames, valances, matchboards, and door and window elements. Noiseless transport system. It is equipped with a booth to completely protect the working area with glazed walls in UV radiation proof matt material. Perfect internal visibility, stainless steel suction chamber, effective filtering system. Stainless steel tanks, easy to clean.

- ✓ Realized to apply UV 100% acrylic coating products
- ✓ Standard stainless steel vats
- ✓ Complete product recovery
- ✓ Product circuit with heater for UV products
- ✓ High efficiency filtering specifically realized for 100% UV products
