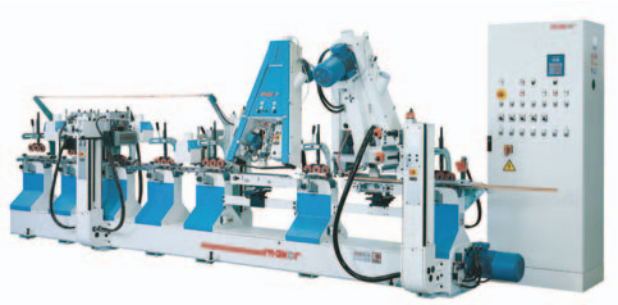
## MAKOR Profile Sanders

Makor delivers an array of profile sanders to ensure high quality results for your work pieces.

**LP – Sanding machine for up to 12" wide profiles**
The LP can be configured with a combination of sanding belts and wheels and is suitable for both whitewood and sealer sanding of mouldings up to 12" (300 mm) wide.



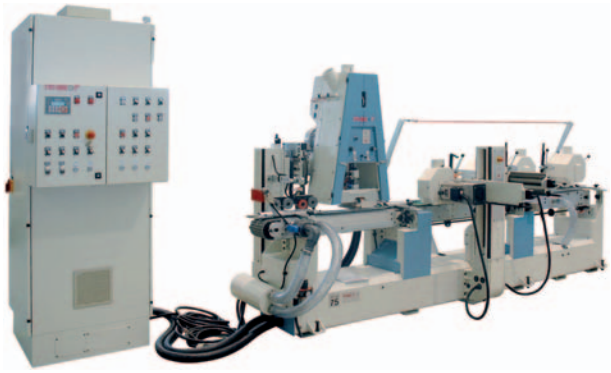
**LC – Sanding machine for up to 8" wide profiles**
The LC can be configured with an extensive range of operating groups to satisfy every sanding requirement for mouldings up to 8" (200 mm) wide.

**LX – Sanding machine with four or six wheels**
The special configuration with two sanding wheels in each working station makes this machine exceptionally compact, ergonomic, and easy to set up. It can process mouldings up to 8" (200 mm) wide.

**LF – Brushing machine**
The LF is available with 2, 4, or 6 abrasive brushes for de-nibbing mouldings up to 8" (200 mm) wide.

# MAKOR Profile Sanders

**LFC – Brushing machine with booth enclosure**
The LFC is designed for sanding and de-nibbing of linear profiles and furniture parts using brushes with fladder-type abrasive materials. The brush units are enclosed in a booth and can process parts up to 12" (300 mm) wide.



**LPC – Sanding machine for short profiles**
A special transportation system with vacuum belt on the LPC allows automatic sanding of parts with a minimum length of 9" (230 mm). It can be designed with a combination of belt and wheel units.

**LCR – Sanding machine with roller feed system for L-shaped profiles**
The LCR is equipped with a motorized metal roller feed system, eliminating conveyor belt wear and related maintenance downtime.
