PERMISSIBLE TOLERANCES FOR CIVIL CONSTRUCTION

- $1/4$ in. center to center of adjacent caste-in-plates
- Elevation of the top of caste-in-plates $\pm 1/4$ in.
- Maximum accumulation of $1/4$ in. per hundred ft. along the established column line of multiple anchor bolt groups, but not to exceed a total of 1 in., where the established column line is the actual field caste-in-plate representative of the centers of the As-built caste-in-plates from a line of columns and supports.
- $1/4$ in. from the center of any caste-in-plates to the established column line through that caste-in-plates.
- The tolerances of paragraphs a,b and c apply to offset dimensions shown on the plans, measured parallel and perpendicular to the nearest established column line for individual columns shown on the plans to be offset from established column lines.

SUPPORT-REACTIONS
