SMOKER
CRAFT

More than one hundred years and five generations in pursuit of our passion.

Tradition begins with the family.

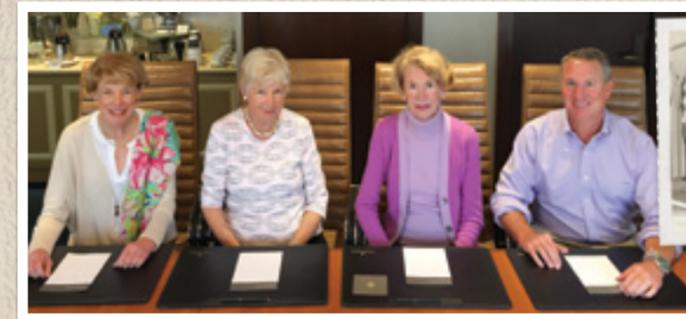

We're not just boat builders. We're boaters, just like you. For five generations and counting, our family has been dedicated to sharing the wonder of boating by creating the finest watercraft that money can buy. That's really all there is to it.

Smoker Craft can trace its roots in the boating industry all the way back to 1921, when the Smoker Lumber Company, as it was then called, was a world leader in the production of oars and paddles. We also built many of the wooden components used in boats produced by several different brands. So in 1963, we built on those four decades of experience and began making boats of our own.

ventilates storage compartments so that gear put away wet doesn't stay that way. Our history is one of constant innovation, and that only results from spending time on the water.

While our designs have evolved over the years, what has remained constant is the painstaking care and meticulous attention to detail that goes into crafting every single one of our boats. Many of our more than 550 employees have been with us for 30 years or more, and their skill and craftsmanship is unmatched in the industry.

We love boating, and we want to share it with the world. That is our commitment. That is our heritage.

Cinda McKinney, Susan Graff, Sara Barrett and Peter Barrett

President Doug Smoker with grandson Henry Smoker

GENERATION 2 VERTEX PERFORMANCE STRAKE™ HULL

Smoker Craft's revolutionary Generation 2 Vertex Performance Strake™ (VPS) hull sets the standard for high performance in aluminum fishing boat design, providing unrivaled acceleration, unequaled handling and the highest ride quality in the industry.

Specially designed, integrated performance strakes mounted to the V-shaped hull feed nothing but clean, undisturbed water to the propeller for maximum bite. That means enhanced boat controls, greater bow lift and a quicker time to plane – even when running with less horsepower.

Break out to the big water, and you'll immediately feel the VPS difference, with its unprecedented stability and its higher, drier ride. That's something everyone can appreciate.

Adventurer 188 T shown here

FAST DRAIN SYSTEM (FDS)
Our enhanced system quickly routes water from the main floor to the bilge through specially designed channels in the cockpit.

TOE KICKS
Toe kicks are strategically placed throughout the cockpit, providing top storage and additional safety.

FISHERMAN TOPS
Feature removable clear-view port and starboard visors. Plus, fast-open side curtains make it easy to reach outside for docking.

CONVENIENT STORAGE
Standard on Adventurer and Excursion Pro models, convenient storage compartments are perfect for Plano tackle trays and other fishing accessories.

VERTEX PERFORMANCE PAD

LIFTING STRAKES

FRESHCATCH
Our aerated livewells are timed for convenience and feature a PowerStream nozzle, a single bilge and black thru-hulls.

FRESHCATCH PRO
Our pro livewells are aerated, timed and feature a recirculating pump to move more water and oxygen into the tanks to keep fish active. Highlights include black thru-hulls and PowerStream aerator and nozzle.

Standard on Excursion

Standard on Adventurer

INTEGRATED GUNNEL TRACK SYSTEM

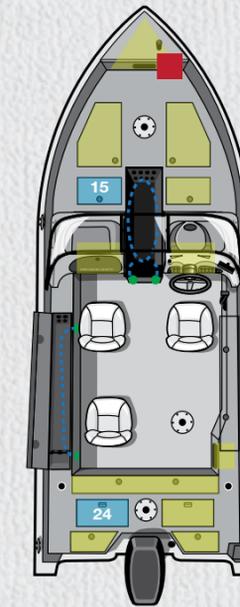

Smoker Craft's exclusive Integrated Gunnel Track System (IGTS) allows for easier installation of rod holders, downriggers and other accessories – without drilling a single hole anywhere in the boat. IGTS is the ideal foundation for factory-installed accessory packages from Scotty Fishing Products, developed by legendary fishermen to meet the individual needs of serious anglers. Ask your dealer for details.

YARBLOW VENTILATION SYSTEM

Let's face it, on a fishing boat, gear sometimes gets put away wet. That's why Smoker Craft is proud to offer the exclusive Yarblov Ventilation System that circulates fresh air through rod lockers and storage spaces to protect expensive tackle from rust and corrosion. Pressurized air keeps mold and mildew from establishing in storage compartments, as well as traditionally wet areas like the bilge, protecting your gear and the boat itself. It's all part of our commitment to providing peace of mind and giving you more value for your investment.

ON/OFF SWITCH
FAN
AIR FLOW

CONSTRUCTION YOU CAN COUNT ON.

UPHOLSTERY
Produced in-house for quality control and customization, Smoker Craft upholstery is precision cut and installed using only stainless, non-corrosive fasteners. Cushioning foam is biocide treated to help prevent mildew and fungal growth that can discolor vinyl. This process is a key differentiator when comparing Smoker Craft to other manufacturers.

CARPET & VINYL
Smoker Craft casting platforms and decks are covered in marine-grade carpet that is both glued and stapled, while cockpits feature easy-to-clean vinyl. Optional snap-in carpet can be added over the vinyl for added comfort.

SEADEK® SOFT TOUCH TRACTION MATS
These mats are easy to clean; resistant to mold, mildew and stains; and offer superior wet or dry traction.

FLOOR PANELS
Our pressure-treated plywood floors are 5/8" in the cockpit and 3/4" on the casting decks. They carry a lifetime warranty and will not warp or rot.

INJECTED FOAM FLOTATION
Unlike other manufacturers, we inject foam flotation into pre-routed holes in the floor panels to fill the entire cavity under the floor. The adhesive property of our foam allows it to bond to both the floor panels and the hull, providing enhanced support and excellent sound dampening.

TWICE-BAKED PAINT FINISH
The Smoker Craft paint method includes 3 coats of base urethane and 3 coats of accent color, with baking under infrared heating coils after each step – giving it a twice-baked, diamond-hard finish that is resistant to chipping and fading, and looks great for years to come.

ZINC CHROMATE PRIMER
Zinc chromate primer is chemically etched into the aluminum hull, forming a corrosion-resistant surface. This also creates an even, bondable surface for the final paint layer.

HIGH-GRADE ALUMINUM
Smoker Craft boats start with 5052 H34 Cold-Rolled Aluminum for its superior strength, hardness and corrosion resistance. Computerized fabrication equipment delivers precision components and ensures consistent quality.

DOUBLE RIVETS
The sides and transom are riveted with a double row of airplane-style rivets on the seams on all models 17' and above. The rows are offset to completely seal the seam.

STANDING STRONG ON FOUR FOUNDATIONS.

THE INDUSTRY'S BEST WARRANTY. PERIOD.

Only a company with the proven history and longevity of a brand like Smoker Craft can offer something like this:

- Limited lifetime warranty on hull and structure
- 6-year warranty on all components, carpet and upholstery*
- All parts and labor
- Transferable to second owner

C-ZONE DIGITAL WIRING SYSTEM

Simplify your boat's operation system with C-Zone digital wiring. C-Zone gives you complete control of all electrical functions with the touch of a button. From monitoring pump levels, battery levels and other critical functions, to optimizing the onboard environment via a multi-circuit switch, you can take your boat to the next level of performance and sophistication when you let C-Zone do the thinking.

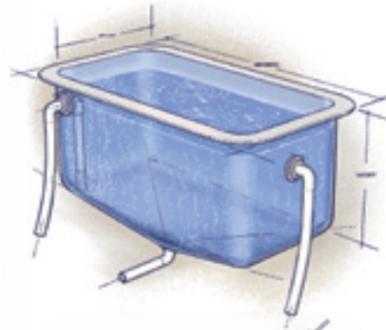

Scan the code to learn more:

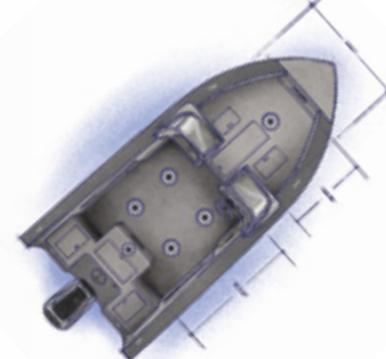

LIVEWELLS

What's the point in having a livewell if you have to constantly fuss with it? Our FreshCatch Pro recirculating livewells use heavy-duty pumps and PowerStream aerators to move more oxygenated water through the tank and keep fish healthy. Just hit the timer and forget it, so you can focus on the fish below the boat – not the fish that are already in it.

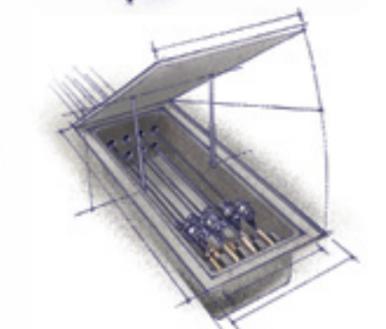

BOW PLATFORMS

Our raised bow casting platforms are carefully designed to give you plenty of elevation for better visibility and more storage space, while maintaining plenty of interior depth for added safety and a dry ride in rough conditions. Our exclusive raked bow design gives you more interior space up front, allowing larger in-deck storage compartments for storing bulky items.

ROD STORAGE

Our rod storage spaces are designed to protect expensive tackle from damage while keeping it readily available for instant access. Select models feature lockable bow in-floor center storage that holds up to 12 rods securely in individual tubes.

CONSOLES

Smoker Craft deluxe consoles put everything you need just a glance away. Their ergonomic designs position gauges so they're clearly visible while running, and toggle switches are always within easy, unobstructed reach. Hydraulic steering comes standard or is an option on many models.

SMOKER CRAFT

The Smoker Craft Contour Edition is available on Adventurer, Explorer, Excursion Pro and Excursion models. This exciting new offering features a custom hand-painted graphic design, featuring contour lines, which is perfectly matched to contour-styled SeaDek® and Seating. Not to be forgotten is the woven vinyl platforms, which are also standard with the Contour Edition.

NORTH AMERICAN ANGLER

WHEN IT'S TIME TO BRING YOUR "A" GAME.

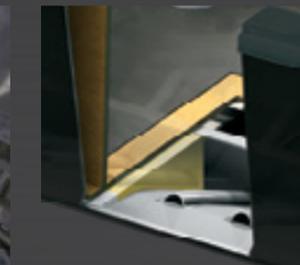

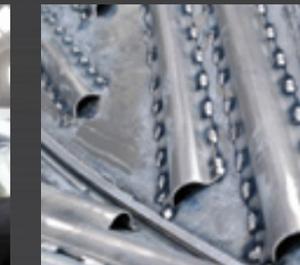

No matter where you love to fish, the American Angler Series by Smoker Craft is up to the challenge. Big water? Rough weather? These all-welded hulls are ready for anything with their exclusive Torsion Beam Construction built for exceptional strength and shock absorption—plus the peace of mind of a lifetime warranty.

THE INDUSTRY'S BEST WARRANTY. PERIOD.

Only a company with the proven history and longevity of a brand like American Angler by Smoker Craft can offer something like this:

- Limited lifetime warranty on hull and structure
- 6-year warranty on all components, carpet, and upholstery
- All parts and labor
- Transferable to second owner

BAKED PAINTED HULLS

American Angler full painted hulls provide showroom looks designed to last for years.

MACHINE FORMED RIBS*

Our unique machine formed ribs are stronger and more flexible than the two-ply aluminum used by many competitors.

TORSION BEAM CONSTRUCTION*

Instead of the flat I-Beams that you find in many boats, American Angler uses our exclusive Torsion Beam Construction (TBC) stringer system for exceptional strength and shock absorption.

ALL-WELDED CONSTRUCTION

Every American Angler series boat offers the toughness and reliability of all-welded marine-grade aluminum construction that's backed by a lifetime warranty.

INJECTED FOAM FLOTATION

American Angler models feature injected foam, not poured, between the floor and hull — filling all air pockets. This provides greater strength and buoyancy and reduces noise.

* Pro Lodge, Pro Tracer and Osprey series

Phantom *where big water meets its match*

Smoker Craft Livewell Options

From evening dinner to that coveted trophy fish, Smoker Craft's FreshCatch aerated livewells keep every catch safe and fresh.

FRESHCATCH

Our aerated livewells are timed for convenience and feature a PowerStream nozzle, a single bilge and black thru-hulls.

FRESHCATCH PRO

Our pro livewells are aerated, timed and feature a recirculating pump to move more water and oxygen into the tanks to keep fish active. Highlights include black thru-hulls and PowerStream aerator and nozzle.
