Vertical Humpback Conveyor Headspace Sterilizer Sanitizer

Control your sterilization process with the Vertical “Humpback” Headspace Sterilizer. Tuck the headspace sterilization conveyor between your capper and cooler on a hot fill line to sterilize and seal hot-filled containers. Containers move through the vertical equipment gripped and tilted, allowing them to stay inverted until the hot liquid has had enough time to sterilize headspace/cap area of the closure. Handling multiple container sizes? The machine’s simple hand-crank adjustments provide flexibility and adjustability.

- **Speed:** Maximum 250 FPM
- **Adjustability:** Size of machine is directly related to the amount of time required for sterilization of cap or closure.
- **Configurations:** Choose a horizontal model for areas with limited overhead space
- **Easy Installation:** Easy installation and start-up, can be shipped assembled

Engineered Solutions Cutting Edge Technology

With A&B Engineering, you get 24/7 support.

New equipment not in the budget? A&B’s Engineering Services engineered solutions will extend the product life span of older, legacy equipment by modernizing your machines and increasing productivity.

Product Specifications

End Product Details

Type: Bottles, Cans

Shape: Non-Round, Round

Fill: Full, Hot-Filled

Material: Aluminum, Glass, Plastic

General Design

Material: Stainless Steel

Wearstrip

Type: Oil-Impregnated UHMW

Motor/Drive

Type: Standard Duty Motor, Wash Down, Stainless
Steel Wash Down

Type 2: Gear Motor

Style: Shaft Mounted

Supports

Construction: Formed Channel

Warranty

Warranty: 1 Year Warranty
