## The Practix OK-12 Heat Transfer Press

Practix Manufacturing's OK-12 is one of the most advanced heat transfer machines currently available. With a heavy-duty unitized frame, 12" diameter drum, and varying belt widths that allow for printing on fabrics of all sizes, the OK-12 is a **heat transfer press** that is unlike anything else in its class.

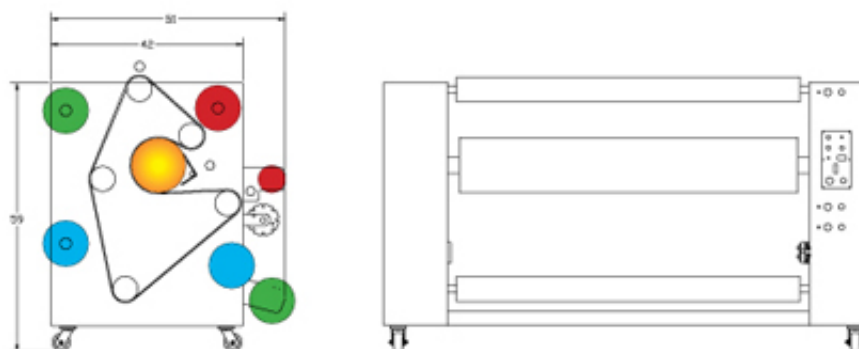

The Practix OK-12 commercial heat press features the following:

- 66", 88", 104", and 128" belt widths allow for printing on full-width fabrics
- 12" (300mm) diameter drum makes it the fastest small drum rotary transfer printing machine on the market
- Economical, value-driven rates
- A heavy-duty unitized frame with solid steel construction
- Oil-filled drum enables colors to print consistently from side-to-side, as well as job-to-job
- Standard triple unwind/rewind system for transfer printing from roll-to-roll
- Pneumatic brakes and clutches for precise tensioning of fabric and papers
- Ability to print banners, exhibit backdrops, sportswear, and casino felts with ease

Perfect for printing on a wide variety of materials, the OK-12 can produce beautiful, flawless designs for t-shirts, sportswear, display banners, awnings, floor mats, mouse pads, upholstery, and more. As an added bonus, Practix is one of the only **heat transfer equipment** manufacturers to offer fully customizable options for modified, colors, shapes, sizes, and more.

**Contact** Practix Manufacturing today at 1-770-9741480 to learn more about the various types of equipment we offer or to order the OK-12 heat transfer press for your business. Serving businesses across the globe, we will gladly hand-deliver or ship to companies worldwide.
