

EPMO PUNCHES & DIES

- A LARGE RANGE OF TECHNICAL SOLUTIONS
- A BETTER PRODUCTIVITY
- INNOVATIVE SOLUTIONS
- TOOLING FOR ALL TYPES OF PRESSES

EPMO, expert partner in tooling for the pharmaceutical and cosmetics industries. For over 60 years, thanks to its three major activities, EPMO has been offering its customers solutions for powder compression, tooling and feeding systems for blister packaging, as well as parts for compression presses.

Technical
Description**PRODUCT**

EPMO offers a large range of technical solutions in terms of steel (approx fifteen different types) and technical coatings (about 10 electrolytic coatings and PVD). The combination of these steels and coatings offers a large choice of technical solutions.

TECHNICAL DATA**Possible formats:**

Toolings are available for all kind of compression press. Manufacturing tolerances comply with ISO 18084 standard, or according to customer specifications.

Steels used:

A wide range of steel grades. Meeting specific needs of our customers: corrosion resistance, high level of compression strength.

Options:

Wide choice of technical options available: extensive selection of anti-corrosion coatings, anti-wear and anti-adhesive.

Services:

EPMO strength starts with tablet development, where we offer full customer support.

EPMO helps during the tablet conception itself to anticipate compression difficulties, as well as at the final packaging stage.

ADVANTAGES

EPMO manufactures many varieties of tooling, from standard ones (B, D, D+) to more specific ones (multiple assembly, tooling for tablets with holes, multi-tip punches cast in one piece, rotating head, removable head...)

Rapid and skilled staff: A commercial and technical staff dedicated to the customer support to define the best specification and give the best answer to process constraints. Our staff has the experience and know-how in defining tablet sizes to make production and packaging easier.

A large choice: Of steel types which allows us to adapt specifications to customer needs and technical coatings, answering specific problems like sticking, capping, flaking etc.

Innovations: Rotating ring, optimised punch head to increase compression time, new coatings... supporting the manufacturers employing the tools in daily work, R&D for anti-sticking solutions...

THE COMPRESSION TOOLING IN SHORT

EPMO has specialized for over 60 years in the design and manufacture of powder compression tooling for the pharmaceutical, nutraceutical, veterinary, cosmetics, food, automotive and detergent industries.

EPMO's French production site is one of the leaders in its field, guaranteeing unequalled security of tooling supply.

EPMO's design office defines the most appropriate technical specifications and, if necessary, establishes real technical partnerships to develop specific solutions.

EPMO offers a complete range of products and services.

Due to continued updating of our equipment, the texts, illustrations and technical specifications mentioned on these pages are illustrative only and are subject to change without notice.
