

## SPARE PARTS FOR PRESSES

- A GMP QUALITY
- COMPETITIVE RATE
- FAST DELIVERY

*EPMO, expert partner in tooling for the pharmaceutical and cosmetics industries. For over 60 years, thanks to its three major activities, EPMO has been offering its customers solutions for powder compression, tooling and feeding systems for blister packaging, as well as parts for compression presses.*

Technical  
Description**The products – same like and kind spare parts as the original one**

EPMO manufactures spare parts for rotary presses for the following areas :

- compression and pre-compression,
- powder feeder
- guide cams,
- turrets accessories,
- scraper,
- ejection,
- transmission,
- lubrication.

The parts are available to fit older presses as well as new generation presses. We fit many well-known presses : Fette, Ima-Kilian, Courtoy, Korsch, Manesty, Stokes, ... EPMO target is to propose same like and kind spare parts as the original manufacturer.

Though, we are experienced at developing tailored solutions, when standard parts don't perfectly meet the customer's requirements. This kind of development is precisely mentioned in our catalogs (SP mention).

**Our positioning : an outstanding reverse engineering, a mass production, a continuous stock.**

The development of our range of products is based upon duplication of original parts.

We control and honor any industrial patents.

We measure the parts geometry thanks to very modern measuring instruments (3D scanner, three dimensional, 3D measuring arm...). We produce drawings using OEM presses standards.

Material choices most suitable to our customers' needs. The lifespan of our spare parts is equal or greater than the original manufacturer's. The parts are mass produced to reduce the costs. The production is realized in two production sites: each has a staff composed of 80 people.

Storage (more than 4 000 references/items) in the 2 production sites, to minimize delivery times.

Our customers are not bound to their own OEM.

**Technical data – a complete range for all kind of presses**

- Material: spare parts in stainless steel, steel, bronze, plastic...
- Manufacturing: bright parts, casting parts, casting parts by injection
- Identification of parts: each part is identified with an EPMO item code. When the manufacturer part number is known, we match it with our item code. By this way, you can use as well OEM item or EPMO item in your exchanges with our technical staff.
- Material Certificate: it can be provided, upon request, for parts that are in contact with the powder.
- Pressure roll in hardened steel at 62-64 HRC or nitrided for a longer lifespan.
- Feeder pan in aluminium with hard coat anodize, in stainless steel, in plastic.
- Paddle in bronze or in stainless steel.
- Complete powder feeders
- Scraper bars in bronze, stainless steel or in plastic.
- Ejection bars in aluminum with hard coat anodize, in stainless steel, in plastic.
- Fill cams in bronze, steel or in plastic. They are dedicated to guide punches EURO B, EURO D in conformity with ISO norm 18084 : 2005 but also for punches with specific OEM norms EU1"441, 20/28, 25/32, EU 35, EU 45...
- Turret Accessories: scraper seal, die screws, punches retainers, drip cups or bellow seals to avoid contamination of the powder by the lubricating oil...
- Drive Shaft and bronze worm turret drive, belt pulleys...
- Dosing elements, head felt for punches...

**ADVANTAGES**

**Quality :** Choice of materials, accuracy manufacturing, metrological control EPMO spare parts responds to OEM's standards.

**Competitive rate :** Our rate allows an average financial savings of 25% compared to presses manufacturers.

**Europe storage :** For an immediate availability.

**Quick/fast answer :** Prices offers for spare parts in catalogs are sent within 1 or 2 days.

**Express delivery :** Possibility of delivery the very day in France and Day + 1 or Day + 2 for the other European countries.

**THE PRESS PARTS IN SHORT**

Parts with an excellent quality, a very competitive price and 50 years experience.

Compatible parts and a first class service in Europe.

Many references available.

An efficient and available technical support.

Due to continued updating of our equipment, the texts, illustrations and technical specifications mentioned on these pages are illustrative only and are subject to change without notice.
