Handy safety blade with magnetic locator:

Heated shoes provide a rapid warm-up and consistent heat source for both high and low melt films.

Simple to use pushbuttons, which offer both pre-set and fully variable controls, allow optimum settings for temperature and speed.

Colour coded mandrels ensure that core grips always face the correct way to tension the film for a flat result.

A security lock is provided for multiple user sites such as schools, colleges and offices.

Cooling fans give a high quality finish.
