

**PONDERAY NEWSPRINT COMPANY
INTER-OFFICE MEMORANDUM**

TO: File: 210-3130; SAVEALL DISC FILTER

FROM: Warren Weber

DATE: September 14, 1995

SUBJECT: SEPTEMBER OUTAGE WORK COMPLETED - FOLLOW UP NOTES

Work completed during the September 1995 shutdown included Saveall Disc Filter replacement valve. This was a Capital Project AFE 95-20, work order #: 13176. Dan Farmin ordered the valve March 31, 1995 reference requisition #; DJF006. It is not fully understood as to why, but delivery was very long and doubtful in time for our September shutdown. The valve arrived only one day prior to scheduled shutdown. Drawings were minimal at best.

Other work on the Saveall was performed and reassemble the saveall included installing this new retrofit valve.

 **OUR HEDEMORIA SAVEALL NOW HAS A HYMAC RETROFIT CLEAR / CLOUDY VALVE INSTALLED.**

Drawings and documentation received are included with this memo.
