

Industrial Quality Machines Built to make your business run its best

Arch Moulders

FAS-LX - 6" Universal Arch Moulder
FAS-HD - 8" Universal Arch Moulder (pictured)
FAS-122 - Double Spindle Radius Profiler

Arch moulders cut curved profiles with a unique floating feed system that registers on the outside edge of the curved blank.

Universal Handrail Moulder

The FAS-Cobra is the only handrail moulder that can handle squaring and dimensioning of laminated glue-ups, as well as profile shaping of spiral, curved, and straight handrails.

Haunchers - Notchers

These heavy-duty machines make shaped cuts in the end or along the edge of a board or panel. For box joint, finger joint, or tenon cuts. Also used to shape the end of a moulding such as a window apron.

Models available: CHB-8, CHB-12, CHB-16, CHB-20, and Double Spindle Hauncher-Notcher

Notcher for Beaded Face Frames

Designed to make notches along the edge of beaded face frame material. Easily cut a notch in the end of the moulding, in the center, or clip the chamfer with a special pop-up fixture. May work in manual mode with the optional flip stops, or could be synchronized with automatic positioning systems like TigertStop.

Models: CHF-270-A and CHF-270-CNC (pictured)

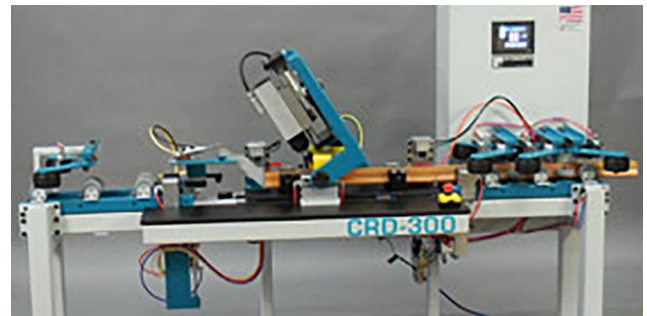

CSR-750CNC Stair Router

Pre-programmed for most stair routing applications. Retains full programming capability using standard CNC codes.

CRD-300 Handrail Drilling Machine

Fully automatic CNC drill for drilling handrails and plates (optional). Operates with speed, precision, and minimal set up time.

These are only a few of the machines available. Contact for information
