

A CLEARER VISION FOR THE PERFECT FINISH

jupiter

fully automated B2 laminator

The Jupiter is a fully automatic laminator for sheets up to B2 size. Compact and easy to use the Jupiter is designed with today's print-on-demand market in mind. Its features make it equally adept at running both digital and lithographic output.

A CLEARER VISION FOR THE PERFECT FINISH

fully automated B2 laminator

The suction feeder offers a deep pile for longer run work and is easily adjustable for a variety of different sheet sizes.

A pneumatically controlled infeed roller presents lightweight and digital output to the laminating and nip rollers where a missing sheet detector helps to prevent unwanted wraparounds.

The centralised PLC control panel offers ease of operation and is enhanced with a modem link for remote diagnostics.

The film mandrel swings out to speed roll changes.

Film can be adjusted laterally on the run to minimise waste and down time.

A decurl bar, which may be altered on the run, is fitted to assist in giving a flat result.

The positioning of the pneumatically controlled perforator overcomes any potential issues caused by poor film roll profiles and allows higher speeds to be maintained.

The adjustable burster automatically separates sheets up to B2 size.

A cushion of air supports the sheet as it is delivered into the Jogger.

The standard Jogger may be adjusted to suit various sheet sizes.
