

iCare IC200

Tonometer

Fact Sheet

Product Overview

iCare IC200™ is a rebound tonometer designed for accurate, fast, and comfortable intraocular pressure (IOP) measurement.

Ideal for use in clinics, emergency rooms, and surgical settings, iCare IC200 offers 200° of positional freedom and requires no anesthetic drops or air puff.

Key Features

Quick Measure: A fast measuring mode for challenging patients.

200° positional freedom allows use on seated, reclined, or supine patients.

No need for anesthetic drops or air puff.

Automated alignment with visual positioning indicators.

Compact, lightweight, and portable design.

Clinical Benefits

Improves patient comfort and reduces test anxiety.

Enables IOP measurement in diverse clinical scenarios.

EasyPros Alignment indicator to confirm positioning.

Delivers consistent, high-quality readings across patient types.

Fast, reliable, and repeatable measurements.

Experience Faster and Easier IOP Measurements with Quick Measure

The new feature enables the iCare IC200 to measure IOP using only two or three rapid individual measurements instead of the standard six. This reduces test time to about one-third of the device's default measurement method, making Quick Measure an ideal solution for even the most challenging patients.

Customer Testimonials

“The ease of use and accuracy of the iCare Tonometer is the reason I have chosen to make this instrument an integral part of my eye exams in my optometric practice.”

— *Minh Ta, OD*

Using the iCare tonometers not only saves time, but they also provide highly accurate readings without “traumatizing” the patient in the process. Honestly, I can’t imagine practicing without an iCare tonometer!

— *Samuel D. Pierce, OD*
