

PRLP

Universal and adjustable wrapping machine for chocolate confectionery

Adjustable wrapping machine, specially conceived to handle all sorts of moulded or coated chocolate confectionery. It can be adapted by means of relevant accessories to achieve end folding, brush wrapping, band labelling, wrapping and smoothing of chocolate eggs as well as cylindrical and spherical products. The machine can also be equipped with accessories to crumble or pleat aluminium foil on confectionery products. Other articles such as spools of thread can be wrapped on this machine.

Product size range

End folding

Length	20 to 50 mm
Width	15 to 40 mm
Height	6 to 30 mm

Brush wrapping

Length	20 to 55 mm
Width	15 to 40 mm
Height	6 to 30 mm
Diameter	15 to 45 mm

Eggs:

Length	26 to 58 mm
Diameter	18 to 36 mm

Cylindrical bottles:

Length	50 to 75 mm
Diameter	16 to 30 mm

Spheres:

Diameter	18 to 30 mm
----------	-------------

The maxi and mini sizes when cumulated must be checked in relation to the relevant wrapping material dimensions.

Output

Without band label:
up to 130 wraps per minute.
With band label or when wrapping spherical products:
up to 90 wraps per minute.

Construction

Cast-iron base. Speed adjustable during machine operation. Wrapping material locking system when products not available in the disc. Horizontal feeding disc. Discharge on horizontal conveyor or inclined channel for smoothed products.

SAPAL®

PRLP

Upon request

Belt infeed. Electronic centering device for wrapping material.
Band labelling device. Turnstile to place the band label over the folds. Smoothing device for foil over eggs, bottles, spheres, a.s.o.
Pleating device. Crumbling accessories.

Wrapping styles possible

A) Chocolate pieces:

1) End folding

Plain, embossed or paper-backed aluminium foil, reel fed, with continuous print or print electronically centered over the product.

2) Brush wrapping

Plain or embossed aluminium foil, reel fed, with continuous print or print electronically centered over the product, folds underneath the product.

3) Band labelling

Possible for the wrapping styles 1 and 2 above by means of a band labelling device placing the band label around the product as a second operation. The band label is stack fed and glued by cold glue. Possibility of band label being placed length- or crosswise over the product. The band label can have two medallions placed on top and underneath the product.

Band label dimensions:

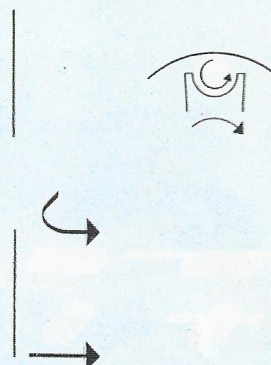

Length 60 to 116 mm
Width 7 to 30 mm

B) Eggs, cylindrical or spherical products:

Plain or embossed aluminium foil, reel fed, with continuous or electronically centered print, end folded. The article is then rolled in a smoothing device.

Reel sizes

Outer diameter 250 mm
Inner diameter 70 mm
Maximum width 125 mm
Maximum reel weight 18 kg
Cut-off length 38 to 105 mm

Power

Power required 2 kVA

Floor space occupation

Machine 205 x 142 x 124 cm

Machine without band labelling device

Net weight 740 kg

Gross weight 935 kg

Machine with band labelling device

Net weight 840 kg

Gross weight 1035 kg
