- All common wrapping materials can be used.

**Material dimensions**

- Reel diameter: 350 mm max.  
 - Reel width: 115 mm max.  
 - Core diameter: 40 – 75 mm

**Measurements**

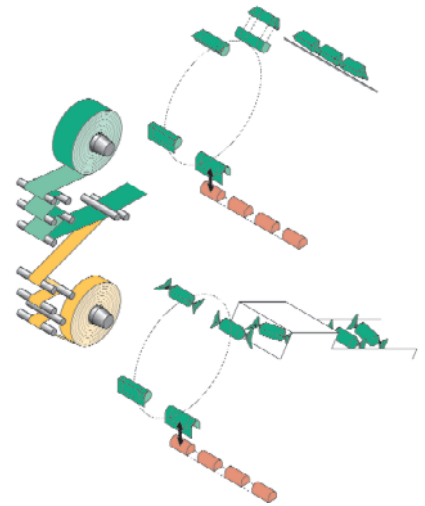

- Length: 1565 mm  
 - Width: 1890 mm  
 - Height: 1535 mm

**Weight**

- approx. 1100 kg

Wrapping machine for deposited or enrobed chocolate products with or without center-filling in double twist, sachet wrap and/or »Vienna-fruit« fold

Wrapping machine for deposited or enrobed chocolate products with or without center-filling in double twist, sachet wrap and/or »Vienna-fruit« fold. The products are aligned by means of a feeding and separating station and are conveyed to the wrapping station by a feeding belt.

## Special features

- Less sensitivity to candy tolerances due to mould wheel grippers opening in both directions
- Saving of wrapping material by »no product – no paper« -device
- Infinitely variable adjustment of the twist gripper oscillation depending on the wrapping material
- Quick size change by the exchange of a few size parts only
- Quick conversion from double twist wrap to sachet wrap, and vice versa

## Optional extras

- Photo-electric print registration of the wrapping material
- Additional reel holder when using a third wrapping material

## Operation

- Easy operation via a clearly arranged panel with fault indication
- Excellent accessibility for operation and maintenance
- Easy cleaning due to swivable material feed unit

## Combinations

- The EL11 can be provided with an automatic feeding and separating unit, type MG5, and can directly be synchronized to the processing line.
