YOUR QUALITY AND BOTTOM LINE just reached the top.

QUALITY

Unsurpassed Quality

With variable drop sizes of 7, 14 and 21 picoliters, the latest Ricoh printhead technology on our Q5-Series printing presses delivers the absolute highest quality imaging available at its price point.

PERFORMANCE

Unparalleled Performance

Built on our proven flatbed and hybrid technology for simplicity, durability and ease of operation, the Q5-Series printing presses will thrive in your environment and deliver to your expectations.

AFFORDABILITY

Unbelievably Priced

When compared to similar printers in the market, the Q5-Series line of printing presses features a considerably lower initial investment cost along with lower long-term operational costs. This adds up to a much shorter return on your investment, allowing profits to start growing sooner.

UPGRADEABILITY

Unique Customization

With the option to upgrade from one row to two rows of printheads on the Q5-500(h) and Q5-1000(h), our printing presses are customized to meet your specific business needs.

The Latest Ricoh Printhead Technology

Featuring variable dot, true grayscale imaging – 7, 14 and 21 picoliters – at a native 300 dpi.

Auto Height Detection System

Automatically detects the height of media up to 4" thick and calibrates printhead distance for optimal dot placement and image quality.

UV/LED Curing Lamps

Instant curing of UV ink for fast production. Cures on both the left & right pass. LED is an option on all models.

Top Printing Speed: Up to 605 ft²/hr*

Engineered for high-quality printing yet outputs up to (18) 4' x 8' boards an hour with full bleed capacity. *Q5-1000 with 2 print head rows, 3 pass.

Static Suppression Option**

Optional static suppression kit that reduces static on the substrate. **Available on some models.

Reversible Vacuum Valve**

Reverse the air vacuum for easier rigid media loading and unloading. **Available on some models.

Mechanical Pin Registration System

Pin registration for accurate and consistent rigid media placement.

Power Vacuum & Lamp Switches

On/Off switches for vacuum table and lamps.

Emergency Stop Switches

Stop operation from any corner of the printer.

The Q5-Series printing presses are ideal for creating **retail point-of-purchase graphics, backlit displays, high-end packaging, art reproduction prints** and so much more. Q5-Series printing presses are available with 2 to 8 printheads.

Q5-250 UV FLATBED

3.25' X 5' Max Media Area

Q5-500 UV FLATBED

4' X 8' Max Media Area

Q5-1000 UV FLATBED

5' X 10' Max Media Area

4-Zone Vacuum System

Eliminates the need for manually zoning the table with scrap material. Individual 4-zone isolation system allows for easy setup of small batch printing.

On Board Control Module

Allows user to adjust printer settings specifically for each ripped file, and make on-the-fly adjustments of ink and media settings, white ink work flow and physical printer settings.

Optional static suppression kit that reduces static on the substrate. **Available on some models.

Retractable Alignment Bar

Mechanical alignment bar allows for accurate and consistent media placement.

Vacuum Belt-Driven System

Full-width vacuum belt provides accuracy and versatility for virtually any size rigid or flexible media.

The Q5-Series hybrid

UV printing presses produce

high-quality, high-volume results on

either roll or rigid media. The belt-driven vacuum print bed securely and accurately transports flexible or rigid media through the printing press.

Allows user to adjust printer settings specifically for each ripped file, and make on-the-fly adjustments of ink and media settings, white ink work flow and physical printer settings.

Proven Quality & Performance with the latest Ricoh printhead technology

Ricoh's multi-drop technology enables grayscale printing by varying the drop size of each individually printed image pixel. The latest Ricoh printhead technology, installed in the Q5-Series printing presses, features 1280 nozzles per printhead. This printhead prints in true grayscale multi-drop 7, 14 and 21 picoliters at a native 300 dpi for outstanding, close-view print quality.

Along with great print quality, this Ricoh printhead also features fast printing speeds on all the Q5-Series printing presses — up to a blazing 448 ft²/hr* (Q5-1000) and 605 ft²/hr* with models that utilize the double-row printhead configuration.

*Speeds at 3 pass

Media Versatility

Quickly change setup from roll media to rigid media

Two front and rear extension tables can be secured to the main body to facilitate printing on rigid media up to 2" thick.

The retractable alignment bar aides in rigid media placement, and the vacuum belt-driven printing bed holds media stable while moving it through the printing gantry. Rollers set in the table tops help in gliding rigid media in and out of the printing press.
