

Semi automatic machine to produce wrapped rigid boxes max 13cm high.

Manual positioning of the glued paper on the last (paper gluing using a separate gluing machine).
Fully automatic coating/wrapping of the box and ejection of the finished product onto the collection surface.
Touch-screen display for automatic size change, setting parameters and memorizing the various work programs.

Technical features

Box sizes:

- min. 80x80mm (internal)
- max. 400x400mm (external)
- height min. 20mm – max. 130mm

Paper thickness: 110 - 150gr./m²

Job sizes-change over: 5 min.

Mechanical speed: 500 cycles/hour

Production capacity:
300/350 wrapped boxes/hour
