

A CLEARER VISION FOR THE PERFECT FINISH

Europa FK

fully automated B2 laminator

The Europa FK is a fully automatic laminator for sheets up to B2 size. Compact and easy to use the Europa FK is designed with today's print-on-demand market in mind.

Its features make it equally adept at running both digital and lithographic output whilst its flying knife separator allows it to separate OPP, Nylon and Polyester films with ease.

A CLEARER VISION FOR THE PERFECT FINISH

Europa FK

fully automated B2 laminator

The suction feeder offers a deep pile for longer run work and is easily adjustable for a variety of different sheet sizes.

An infeed roller presents lightweight and digital output to the laminating and nip rollers where a missing sheet detector helps to prevent unwanted wraparounds.

The centralised control panel offers ease of operation.

The mandrel has a hinged support and film can be adjusted laterally on the run to minimise waste and down time.

A decurl bar, which may be altered on the run, is fitted to assist in giving a flat result.

The positioning of the perforator overcomes any potential issues caused by poor film roll profiles and allows higher speeds to be maintained.

The flying knife separator separates OPP, Nylon and Polyester films with ease whilst a cushion of air supports the sheet as it is delivered into the catch tray.

The catch tray may be adjusted to suit various sheet sizes.
