FINAL
Letter of Acceptance

June 12, 2013

87

Dear

We have completed our referenced field inspection in accordance with our Field Labeling program. This Letter of Acceptance signifies that the subject equipment, after modifications were completed, is compliant with applicable sections of the NEC and the Standards for Safety. This inspection included (8) pieces of Automated Filling & Sealing Machines (4 main machines as noted below, 2 exit conveyors, a vial filler and a cap filler). One exit conveyor is attached to the [REDACTED] and one exit conveyor, vial filler and cap filler are attached to the [REDACTED]. The equipment is located at the Final Installation Site as noted above. The equipment at the facility was evaluated to the standards as noted below. The equipment listed below was labeled during our visit as follows.

| Equipment | Serial # | Model(s) | Standard(s) | Label Number(s) |
|------------------------------|------------|--------------------|-------------|-----------------|
| [REDACTED] | [REDACTED] | [REDACTED] | [REDACTED] | [REDACTED] |
| Tube Filling & Closing Mach. | 468.06 | MONODOSE 6 STAZ | UL 2011 | 60821 |
| [REDACTED] | [REDACTED] | [REDACTED] | [REDACTED] | [REDACTED] |
| [REDACTED] | [REDACTED] | [REDACTED] | [REDACTED] | [REDACTED] |

The equipment noted above was evaluated in accordance with the applicable sections of the National Electric Code (NEC), and the Standards for Product Safety as noted above. This investigation was limited to the evaluation of electrical fire and shock hazards. Routine Verification tests were completed as noted in the test data report. Destructive or performance testing was not performed on this equipment. This investigation is limited to the above equipment only. The test report contains only findings and results regarding the indicated equipment for installation at the particular final installation location. It is not intended as an endorsement of the equipment nor an approval of similar or identical equipment at another location. If the equipment has been modified or changed after the date of investigation/inspection, (other than normal maintenance) the equipment shall require re-inspection before being placed back into service.
