

AN R&D DREAM!

One machine to handle your B and D tooling needs. The H-BD press has 16 stations, alternating B and D sizes, affording your R&D personnel up to 8 operating stations of each. Upper punch bores are keyed for non-round tablets. With pre-compression AND main compression applications, you have control of your tablet development. Changeover from 'B' to 'D' is a quick and easy matter of swapping upper and lower cams. All cams and blanks required are included. Both an open feed frame and a variable speed power feed frame, as well as a variable speed power hopper feeder with automatic product delivery and run out protection are included.

- Heavy Duty Construction
- Stainless Steel Clad
- Isolated Compression Area
- Pre and Main Compression
- Safety Interlocked
- Industrial Hard Chromed Die table
- Punch & die bores are to TSM (IPT) stds
- Instrumentation packages available

**ACCURATE - CLEAN - SIMPLE OPERATION
