# 4.9 MW 2012 Used Solar Taurus 60-7301S Natural Gas Generator Set

## Description

This is an industrial-grade gas turbine generator set . Engineered for natural gas operation and optionally adaptable to other gaseous fuels, it provides a turbine output of approximately 6,100 kWm and delivers about 4,900 kWe of electrical power . Packaged with essential components such as a silenced canopy, gas line, control panel, and exhaust silencer, this unit is designed for streamlined installation and operation

### KEY FEATURES:

- **Power Output:** 4.9 MW electrical power, making it suitable for mid- to large-scale power generation applications.
- **Fuel Flexibility:** optimized for natural gas, with potential compatibility for other gaseous fuels like propane, offering operational versatility.

### ADVANTAGES:

- **Flexible Applications:** Suited to power generation, CHP, mechanical drive, oil & gas remote operations, mining, or microgrids.
- **Modular & Packaged:** Integrated setup reduces civil work, simplifies logistics, and accelerates deployment.
