1 MW New Cummins KTA38G5 Diesel Generator Sets

1 MW New Cummins KTA38G5 Diesel Generator Sets

Description

These diesel generator sets are heavy-duty, high-performance power generation units designed for reliable continuous or standby operation. They deliver consistent 1 MW electrical output, with robust mechanical and electrical design for demanding industrial, commercial, or utility applications. Built to comply with modern emission standards, they feature advanced fuel injection systems for efficient combustion, low operating costs, and reduced environmental impact. The units are equipped with high-capacity cooling systems, automatic voltage regulation, and integrated safety and control systems to ensure dependable performance in various operating conditions. Their durable construction, ease of maintenance, and global parts support make them suitable for long-term, intensive use.

KEY FEATURES:

- **Prime Power Output:** 1 MW (1000 kW) continuous duty capacity.
- **Emissions Compliance:** Meets applicable modern emission standards.
- **Fuel Type:** Diesel, with optimized fuel injection for improved efficiency and lower emissions.

ADVANTAGES:

- **Improved Engine Performance:** Consistent fuel delivery enhances power output and responsiveness.
- **Higher Fuel Efficiency:** Precise injection timing and atomization reduce fuel consumption.

Manufacturer	Cummins
Model	KTA38G5
Year	-
Condition	New
Location	Asia
Qty Available	12 Units
Category	Diesel Generators
Subcategory	1 – 9 MW
Stock Number	USP010162
Wattage	1 MW
Hours	Zero
Frequency	50 Hz
Fuel Type	Diesel
Voltage	380 Volts
Balance of Plant Available? (BOP)	-
