Generator Set

25.5 MW 1997 Used GT-10 Siemens SGT-600 Natural Gas Generator Set

Description

This is a highly reliable, mid-sized industrial gas turbine generator set designed for continuous or peak power applications. The 1997 model delivers up to 25.5 MW of electrical output and is optimized for natural gas as the primary fuel, though it can also operate on liquid fuels with dual-fuel capability.

Built with a twin-shaft configuration, this generator set is known for its fuel flexibility, low emissions, and operational robustness. It is especially well-suited for industrial power generation, combined heat and power (CHP), and mechanical drive applications such as those in oil and gas processing. Its compact package design enables quick installation and maintenance, even in remote or offshore environments.

KEY FEATURES:

- **Power Output:** Rated up to **25.5 MW** (ISO conditions)
- **Dual-fuel capability:** runs on natural gas or liquid fuels
- **Dry Low Emissions (DLE):** system for low NO_x

ADVANTAGES

- **High reliability:** Proven design used globally across diverse industries
- **Compact and modular:** Ideal for space-constrained sites and offshore platforms
- **Flexible application** – Supports simple-cycle, combined-cycle, CHP, and mechanical drive

Manufacturer	Siemens
Model	SGT-600
Year	1997
Condition	Used
Location	Asia
Qty Available	1 Unit
Category	Natural Gas Generators
Subcategory	10 - 99 MW
Stock Number	USP010767
Wattage	25.5
Hours	10000
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	11000 Volts
Balance of Plant Available? (BOP)	-
