5.6 MW 2022 New Solar Taurus T60 Natural Gas Turbine Generator Set

5.6 MW 2022 New Solar Taurus T60 Natural Gas Turbine Generator Set

Description

This natural gas turbine generator set is a compact, high-efficiency power generation unit designed for continuous duty and peaking applications. Engineered for dependable performance, it is well-suited for industrial plants, utilities, and independent power producers requiring reliable medium-scale electricity output. Operating on natural gas, the Taurus T60 offers reduced emissions and cost-effective fuel efficiency, making it a sustainable choice for modern power generation.

As a 2022 new unit, it incorporates advanced turbine technology and digital control systems to ensure high operational reliability, easy monitoring, and integration with existing or new power infrastructure. Its compact footprint and modular design also make it ideal for installations where space efficiency and quick deployment are critical.

KEY FEATURES:

- 5.6 MW rated electrical output
- Compact and modular design for ease of installation
- Suitable for base-load, peaking, or standby generation

ADVANTAGES

- High efficiency and reliable performance reduce operating costs
- Compact footprint allows installation in space-constrained sites
- Low maintenance requirements extend operational uptime and service life

Manufacturer	Solar Taurus
Model	T60
Year	2022
Condition	New
Location	Asia
Qty Available	1 Unit
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010695
Wattage	5.6 MW
Hours	Zero
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	6300 Volts
Balance of Plant Available? (BOP)	-
