0.88 MW 2016 New MTU 16V2000 M41A/B Diesel Generator Set

0.88 MW 2016 New MTU 16V2000 M41A/B Diesel Generator Set

Description

This generator set is powered by the MTU 16V2000 M41A/B engine, a compact and efficient V16 four-stroke design engineered for reliable power generation. Developed for continuous, prime, or standby applications, it delivers stable and consistent electrical output with optimized fuel efficiency. Its robust construction and advanced engine technology make it suitable for industrial, commercial, and marine-based power requirements.

The generator set integrates a heavy-duty alternator with electronic control and monitoring systems to ensure precise performance, protection, and ease of operation. With low emissions, durable design, and simplified maintenance, it provides a dependable power solution with long service life and reduced operating costs.

KEY FEATURES:

- Rated output: 0.88 MW
- High-efficiency alternator for stable electrical output
- Suitable for continuous, prime, and standby power applications

ADVANTAGES

- Low emissions and environmentally compliant operation
- Rugged design ensures long engine life with minimal downtime
- High fuel efficiency supports lower operating costs

|-----------------------------------|-------------------|
| Manufacturer | MTU |
| Model | 16V2000 M41A/B |
| Year | 2016 |
| Condition | New |
| Location | Asia |
| Qty Available | 4 Units |
| Category | Diesel Generators |
| Subcategory | 10 – 99kW |
| Stock Number | USP010871 |
| Wattage | 0.88 MW |
| Hours | Zero |
| Frequency | 60 Hz |
| Fuel Type | Diesel |
| Voltage | 400 Volts |
| Balance of Plant Available? (BOP) | - |
