Harnessing Energy for Life

2 MW 2000 Used Caterpillar 6CM32 Diesel Marine Engines

2 MW 2000 Used Caterpillar 6CM32 Diesel Marine Engines

Description

These diesel marine engines are medium-speed, four-stroke units specifically engineered for marine propulsion and auxiliary power generation. The 6CM32 series has established a strong reputation in the maritime industry for its durability, efficiency, and adaptability, making it a trusted choice for commercial vessels, cargo ships, and offshore applications. Built with a rugged design and reliable turbocharged system, these engines are capable of continuous operation under heavy loads, delivering consistent power output while maintaining fuel efficiency.

KEY FEATURES:

- Rated power output: 2 MW
- Turbocharged with charge-air cooling for improved efficiency
- Heavy-duty construction tailored for marine propulsion and auxiliary power

ADVANTAGES

- Versatile application, suitable for a wide range of vessel types and operational profiles
- Proven track record of reliability in marine propulsion and auxiliary power roles
- High fuel efficiency contributes to lower running costs

Manufacturer	Caterpillar
Model	6CM32
Year	2000
Condition	Used
Location	Asia
Qty Available	2 Units
Category	Marine Diesel Engine
Subcategory	1 – 9 MW
Stock Number	USP010252
Wattage	2 MW
Hours	68000
Frequency	50 Hz
Fuel Type	Diesel
Voltage	11000
Balance of Plant Available? (BOP)	-
