2 MW 2012 Used Jenbacher J 620 Natural Gas Generator Sets

2 MW 2012 Used Jenbacher J 620 Natural Gas Generator Sets

Description

The natural gas generator sets are high-efficiency gas-fueled power units designed for continuous and prime power applications. Each unit delivers a rated output of 2 MW at 50/60 Hz, making them suitable for industrial facilities, utilities, combined heat and power (CHP) projects, and renewable gas applications such as biogas. The J620 is equipped with an advanced control system for precise engine management, optimized combustion, and reduced emissions, ensuring compliance with modern environmental standards.

KEY FEATURES:

- Rated output: 2 MW (2000 kW) continuous duty
- High electrical efficiency with low emissions profile
- Suitable for natural gas and alternative gases (biogas, landfill gas, etc.)

ADVANTAGES:

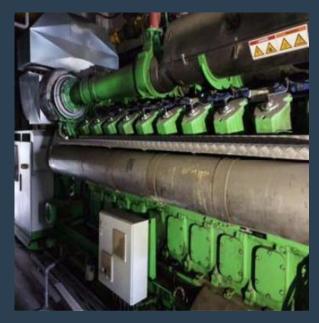

- Reduced emissions support compliance with environmental regulations
- Flexible fuel capability allows operation on natural gas and renewable gases
- Robust design ensures long service life and reliable operation

Manufacturer	Jenbacher
Model	J-620
Year	2012
Condition	Used
Location	Africa
Qty Available	4 Units
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010582
Wattage	2 MW
Hours	3600
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	11000
Balance of Plant Available? (BOP)
