18.5 MW 1992 Used Niigata 12V32CLX Diesel Generator Sets

18.5 MW 1992 Used Niigata 12V32CLX Diesel Generator Sets

Description

The diesel generator sets are medium-speed, four-stroke units designed for heavy-duty industrial and power plant applications. Built for continuous base-load operation, these engines are known for their durability, high efficiency, and stable performance under varying load conditions. The units are complete with alternators and auxiliary systems, offering reliable and economical diesel power generation suitable for both island and grid-connected operations.

KEY FEATURES:

- Total power output: 18.5 MW
- Voltage and frequency adaptable to project requirements
- Proven performance in continuous and standby operations

ADVANTAGES

- Robust and reliable design ideal for base-load and prime power applications
- Designed for long operational life with minimal maintenance requirements
- High thermal efficiency ensuring reduced fuel consumption

Manufacturer	Niigata
Model	12V32CLX
Year	1992
Condition	Used
Location	Asia
Qty Available	4 Units
Category	Diesel Generators
Subcategory	10 - 99 MW
Stock Number	USP010736
Wattage	18.5 MW
Hours	120 000; 140 000; 65 000; 105 000
Frequency	50 Hz
Fuel Type	Diesel
Voltage	6 600 Volts
Balance of Plant Available? (BOP)	-
