5.4 MW 2024 New Solar Taurus T60 Natural Gas Generator Set

5.4 MW 2024 New Solar Taurus T60 Natural Gas Generator Set

Description

This natural gas generator set is a high-efficiency industrial power unit engineered for continuous or peak-load operation. The turbine is designed for dependable performance in power generation, cogeneration, and industrial utility service. Its compact modular package ensures rapid installation, while the advanced dry low emissions (DLE) combustion system provides clean operation with high thermal efficiency. The set offers exceptional reliability, flexibility, and low lifecycle cost for modern distributed energy applications.

KEY FEATURES:

- Electrical output: approximately 5.4 MW
- Single-shaft, simple-cycle configuration with high-efficiency compressor and turbine sections.
- DLE combustion system achieving low NO_x and CO emissions.

ADVANTAGES

- High operating efficiency and low emissions meeting current environmental standards.
- Fast installation and minimal on-site assembly due to modular layout.
- Excellent suitability for base-load, peaking, or CHP applications in industrial and utility sectors.

Manufacturer	Solar Taurus
Model	T60
Year	2024
Condition	New
Location	Asia
Qty Available	2 Units
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010901
Wattage	5.4 MW
Hours	Zero
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	10500 Volts
Balance of Plant Available? (BOP)	-
