1.7 MW 2021 New MTU 16V4000L32FNER Biogas Generator Set

1.7 MW 2021 New MTU 16V4000L32FNER Biogas Generator Set

Description

This generator set is a high-efficiency power generation unit designed for continuous operation on biogas applications. Built with advanced MTU 4000 series technology, this generator set offers reliable performance, low emissions, and optimized fuel utilization. Its robust design and engineering make it suitable for base load power, combined heat and power (CHP) projects, and renewable energy facilities seeking dependable and environmentally friendly energy solutions.

KEY FEATURES:

- **Power Output:** 1.7 MW continuous electrical capacity
- **Emissions Control:** Low-emission design, compliant with international environmental standards
- **Fuel Type:** Biogas, ensuring sustainable and renewable energy production

ADVANTAGES

- **Flexibility:** Suitable for CHP systems, enhancing overall energy efficiency
- **High Efficiency:** Provides reliable base load power with excellent fuel economy
- **Low Operating Costs:** Efficient fuel use and reliable design minimize lifecycle costs

Manufacturer	MTU
Model	16V4000L3FNER
Year	2021
Condition	New
Location	Asia
Qty Available	15 Units
Category	Biogas
Subcategory	1 – 9 MW
Stock Number	USP010853
Wattage	1.7
Hours	Zero
Frequency	50 Hz
Fuel Type	Biogas
Voltage	10500
Balance of Plant Available? (BOP)	-
