3 MW 2011 Used Jenbacher JGS 620 GS Natural Gas Generator Sets

3 MW 2011 Used Jenbacher JGS 620 GS Natural Gas Generator Sets

Description

These 3 MW used natural gas generator sets are driven by Jenbacher JGS 620 GS engines, known for their high efficiency, reliability, and low emissions. Manufactured in 2011, the units are designed for continuous duty operation in industrial and utility applications. Built for stable and efficient power generation, they are suitable for both standalone and combined heat and power (CHP) installations, offering dependable performance and long operating life.

KEY FEATURES:

- Rated output: 3 MW
- Low NO_x emissions compliant with international standards
- Designed for continuous base-load applications

ADVANTAGES

- Excellent fuel efficiency with reduced operating costs
- Suitable for base-load, grid support, or cogeneration use
- Consistent power output and stable operation even under variable loads

Manufacturer	Jenbacher
Model	620 GS
Year	2011
Condition	Used
Location	Europe
Qty Available	1 Unit
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010211
Wattage	3 MW
Hours	43000
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	10500 Volts
Balance of Plant Available? (BOP)	-
