## 39 MW 1979 Used Mitsubishi Steam Turbine Power Plant Generator Sets

# 39 MW 1979 Used Mitsubishi Steam Turbine Power Plant Generator Sets

## Description

This steam turbine power plant generator sets are robust, utility-grade power generation units built for long-term, continuous operation. these sets feature durable steam turbines coupled to high-capacity industrial generators, delivering consistent power output for base-load or peak-load applications. Designed with proven axial-flow turbine technology, they can operate using steam from fossil-fuel boilers, biomass systems, or waste heat recovery plants. Despite their age, these units remain serviceable and offer a cost-effective option for facilities seeking dependable, medium-scale power generation with the potential for refurbishment or modernization.

### KEY FEATURES:

- 39 MW electrical output capacity per unit
- Compatible with multiple steam sources (fossil fuel, biomass, waste heat recovery)
- Suitable for base-load and peak-load operation

### ADVANTAGES:

- Flexible steam source compatibility for varied operational needs
- Ideal for industrial, utility, or cogeneration applications
- Strong operational track record in continuous service

Manufacturer	Mitsubishi
Model	-
Year	1979
Condition	Used
Location	Asia
Qty Available	1 Unit
Category	Steam
Subcategory	10 – 39 MW
Stock Number	USP010832
Wattage	39 MW
Hours	1,200,000
Frequency	60 Hz
Fuel Type	Coal
Voltage	11000
Balance of Plant Available? (BOP)	Included
