1.2 MW 1997 Used Wartsila 8L20 Diesel Generator Set

1.2 MW 1997 Used Wartsila 8L20 Diesel Generator Set

Description

This diesel generator set is a robust medium-speed power unit designed for dependable operation in both continuous and standby power applications. Built in 1997, the set features Wartsila's proven 20-series technology, known for efficiency, durability, and ease of maintenance. The 8-cylinder, 4-stroke, turbocharged engine delivers stable performance and consistent power output, making it suitable for industrial facilities, independent power producers, or marine auxiliary applications.

KEY FEATURES:

- Rated output: 1.2 MW
- Speed: 1000/900 rpm (depending on configuration)
- Configuration: Skid-mounted, ready for installation

ADVANTAGES

- Excellent fuel efficiency and low specific fuel consumption
- Designed for continuous base load or standby operation
- Suitable for power plants, industrial backup, or marine applications

Manufacturer	Warsila
Model	8L20
Year	1997
Condition	Unused
Location	Asia
Qty Available	1 Unit
Category	Diesel Generators
Subcategory	1 – 9 MW
Stock Number	USP010475
Wattage	1.2 MW
Hours	-
Frequency	50 Hz
Fuel Type	Diesel
Voltage	400 Volts
Balance of Plant Available? (BOP)	-
