1 MW 2010 Used Jenbacher J320 GS Natural Gas Generator Sets

1 MW 2010 Used Jenbacher J320 GS Natural Gas Generator Sets

Description

These natural gas generator sets are proven medium-sized gas-fired power units designed for reliable continuous and prime power generation. Each set is powered by a 20-cylinder, four-stroke, turbocharged natural gas engine known for its high efficiency, fuel flexibility, and long service life. With an electrical output of 1 MW, these generator sets are ideal for industrial plants, commercial facilities, and combined heat and power (CHP) applications, as well as renewable energy projects using biogas or landfill gas. Equipped with Jenbacher’s advanced control system, they provide precise engine management, optimized combustion, and reduced emissions, ensuring compliance with international standards.

KEY FEATURES:

- Rated output: 1 MW (1000 kW) continuous duty.
- Designed for natural gas and alternative fuels such as biogas.
- High electrical efficiency and stable performance

ADVANTAGES:

- High efficiency reduces fuel costs and overall operating expenses.
- Lower emissions support environmental compliance.
- Fuel flexibility allows operation on natural gas or renewable gases

|-----------------------------------|------------------------|
| Manufacturer | Jenbacher |
| Model | J320 |
| Year | 2010 |
| Condition | Used |
| Location | Europe |
| Qty Available | 2 Units |
| Category | Natural Gas Generators |
| Subcategory | 1 – 9 MW |
| Stock Number | USP010630 |
| Wattage | 1 MW |
| Hours | 75000; 69000 |
| Frequency | 50 Hz |
| Fuel Type | Natural Gas |
| Voltage | 400 Volts |
| Balance of Plant Available? (BOP) | - |
