## 52 MW 2010 New Siemens SST-400 Steam Turbine Generator Sets

# 52 MW 2010 New Siemens SST-400 Steam Turbine Generator Sets

## Description

This are industrial steam turbine systems designed for reliable and efficient power generation. These turbines are part of Siemens' mid-size SST-400 series, built with modular configuration for both condensing and backpressure applications. With a rated output of 52 MW, they are suited for use in combined heat and power (CHP), industrial plants, and utility-scale power generation. Manufactured in 2010, these units are designed for long service life, flexible operation, and high thermal efficiency.

### KEY FEATURES:

- Rated output: 52 MW
- Modular, compact design for simplified installation
- Dual casing options for condensing or backpressure operation

### ADVANTAGES:

- Flexible configuration suitable for industrial CHP and utility power generation.
- Compact footprint allows easier installation and integration into existing facilities.

Manufacturer	Siemens
Model	SST-400
Year	2010
Condition	New
Location	Europe
Qty Available	1 Unit
Category	Natural Gas Turbines
Subcategory	10 – 99 MW
Stock Number	USP010172
Wattage	52 MW
Hours	Zero
Frequency	60 Hz
Fuel Type	Natural Gas
Voltage	13200
Balance of Plant Available? (BOP)	-
