0.80 MW 2014 Used Caterpillar G3516 Natural Gas Generator Set (Landfill Biogas)

0.80 MW 2014 Used Caterpillar G3516 Natural Gas Generator Set (Landfill Biogas)

Description

This natural gas generator set is a dependable medium-sized power solution engineered to run on low-BTU biogas from landfill operations. Built in 2014, this generator set is powered by a proven 16-cylinder, four-stroke, turbocharged natural gas engine, optimized for renewable fuel applications. With a rated output of 800 kW, it provides continuous and efficient power generation while helping operators reduce emissions and capture energy from waste gas. The unit is designed with Caterpillar’s integrated generator and control systems, ensuring reliable operation, ease of monitoring, and long-term durability.

KEY FEATURES:

- Rated at 0.80 MW (800 kW) continuous output
- Configured for landfill biogas/low-BTU fuel applications
- Designed for continuous duty operation in renewable energy projects

ADVANTAGES:

- Purpose-built for landfill biogas, ensuring reliable operation on alternative fuels.
- Contributes to renewable energy generation and environmental compliance.
- Integrated control and monitoring systems for efficient operation

Manufacturer	Caterpillar
Model	G3516
Year	2014
Condition	Used
Location	South America
Qty Available	1 Unit
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010485
Wattage	0.08.MW
Hours	24000
Frequency	60 Hz
Fuel Type	Natural Gas
Voltage	480 Volts
Balance of Plant Available? (BOP)	-
