14.5 MW Used Mitsubishi Steam Turbine Power Plant Generator Set

14.5 MW Used Mitsubishi Steam Turbine Power Plant Generator Set

Description

This steam turbine power plant generator set is a compact, high-efficiency steam-based power generation unit designed for reliable industrial and utility operations. The system features a precision-engineered steam turbine coupled to a heavy-duty electrical generator, delivering consistent performance for base-load or peak-load requirements. Suitable for integration into various steam supply systems, it can operate using steam from fossil-fuel boilers, biomass plants, or waste heat recovery setups. With a proven operational track record, this unit offers a dependable and cost-effective solution for medium-scale power generation needs.

KEY FEATURES:

- 14.5 MW power output capacity
- Compatible with multiple steam sources (fossil fuel, biomass, waste heat recovery)
- Suitable for continuous base-load or flexible peak-load operation

ADVANTAGES:

- **Versatile steam source compatibility for operational flexibility**
- Ideal for industrial cogeneration or small utility power generation
- Durable design with low maintenance requirements

Manufacturer	Mitsubishi
Model	-
Year	1979
Condition	Used
Location	Asia
Qty Available	1 Unit
Category	Steam
Subcategory	10 – 99 MW
Stock Number	USP010831
Wattage	14.5 MW
Hours	80000
Frequency	60 Hz
Fuel Type	Steam
Voltage	3300 Volts
Balance of Plant Available? (BOP)	Included
